Admission process

< YOU >

Clear the CBNEST (Coding Blocks National Entrance & Scholarship Test) or qualify directly on the strength of your academic profile. Either way you meet the admissions team for an interview and a counselling conversation for you and your parents.

PATH A · VIA CBNEST

Clear the CBNEST and interview.

The default route for most applicants. A thoughtful 2-hour aptitude test, fair across boards and streams followed by a counselling interview.

1. **Register online** — 5-minute form, campus preference, Class 12 marksheet.
2. **Take the CBNEST** — 2-hour aptitude test, online or at an offline centre.
3. **Interview round** — a 30-minute counselling & motivation conversation.
4. **Offer & scholarship** — within 72 hours of your interview.

Best for: any Class 12 student or dropper · science stream · 60%+ aggregate · any board · no prior coding knowledge needed.

PATH B · PROFILE-BASED

Skip the test, go straight to interview.

For students with consistently strong academic records, top-tier board scores, or outstanding achievements. You can skip the CBNEST entirely and go directly to the interview round.

1. **Register online** and upload your Class 10 & 12 marksheets plus any achievements.
2. **Profile review** — our admissions team evaluates your record within 48 hours.
3. **Direct interview** — if shortlisted, you skip the CBNEST and go straight to the interview round.
4. **Offer & scholarship** — decision within 72 hours after the interview.

Shortlisted if: Class 10 & 12 aggregates both 90%+ · OR JEE Main percentile 90+ · OR a verified top-tier olympiad / hackathon / open-source / published-work record.

Both paths converge at the interview round

A 30-minute counselling conversation · for you and your parents

Coding Blocks School of Technology

Engineered for the AI Age

B.Tech for the AI-first generation.

The technology industry is undergoing the most drastic shift in its history. Artificial Intelligence is no longer a future concept, it is the present reality that is reshaping every company, every job profile and every career path. In this environment, the question is not just whether the aspirant will get a B.Tech degree but whether that degree will prepare them to thrive in an AI-first world.

Coding Blocks School of Technology (CBSOT) was built to answer that question. After more than twelve years of training engineers who now work at Google, Amazon, Microsoft and India's finest startups, Coding Blocks is bringing that same teaching philosophy into a full four-year B.Tech programme one that builds real engineers from Day 1.

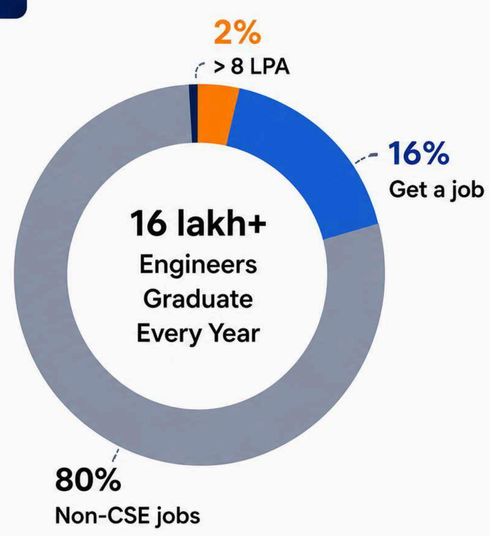
India's Engineering Reality

16 lakh+
students graduate as engineers every year

Only 16%
find a job

80%
are in non-CSE jobs

Only 2%
earn more than 8 LPA



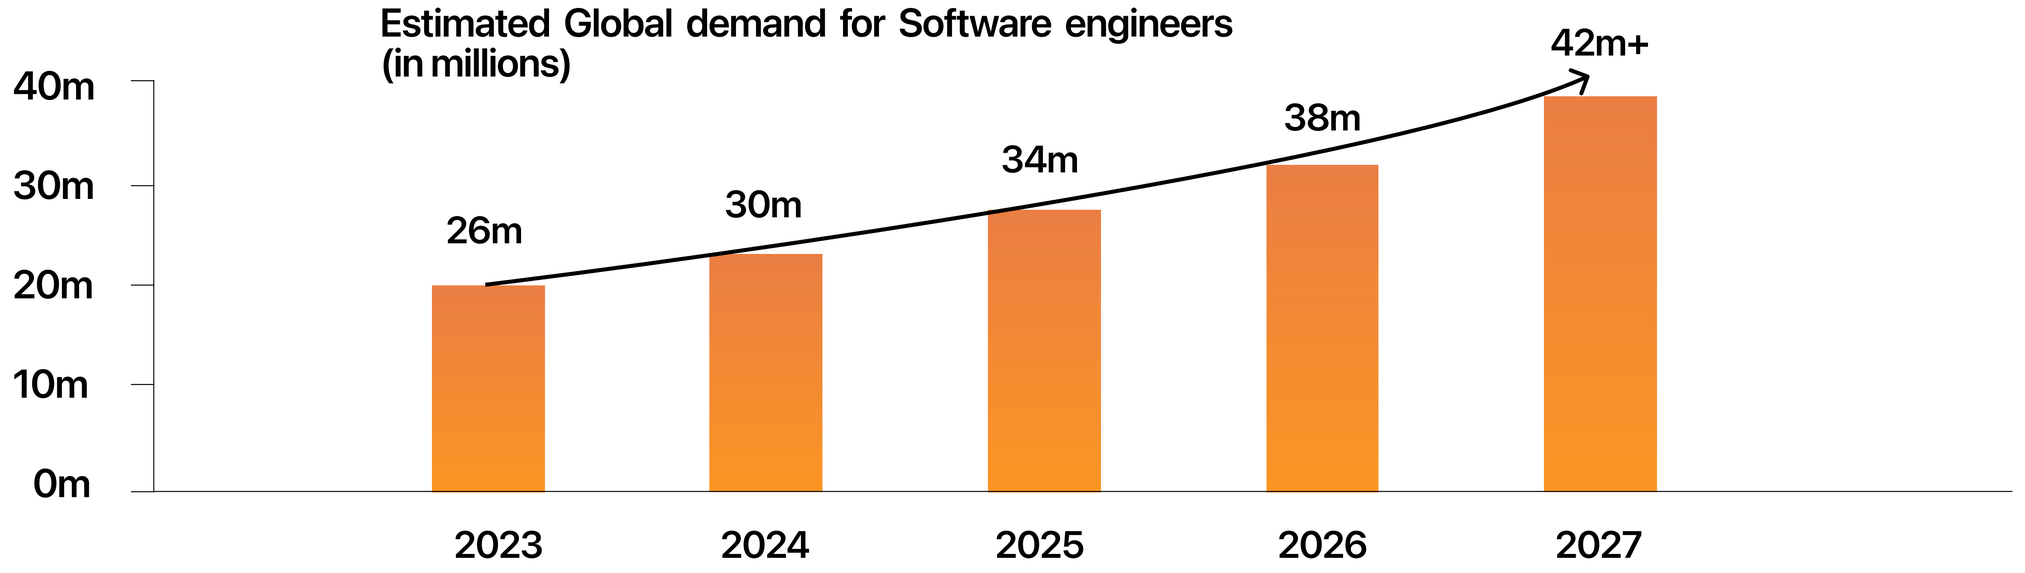
Your 4-Year Growth Journey

Year 1	Year 2	Year 3	Year 4
Think like an engineer	Build like an engineer	Ship like an engineer	Pick your launchpad

One Goal: Build real engineers who can build the future.

Demand for High-quality engineers is exploding

Estimated Global demand for Software engineers (in millions)



> **In a world reshaped by AI, we don't prepare students for jobs that exist.**
>
> **We prepare them for jobs that don't exist yet.**

INTRODUCING

Coding Blocks

School of Technology

A forward-thinking educational institution redefining how students learn, create and lead. Our innovative approach seamlessly blends theory with real-world application, empowering learners with practical skills, critical thinking and the confidence to shape their future.

Pan-India Presence

A strong network across the nation, building communities of future leaders.

Excellence Driven Academic Environment

A culture of excellence that inspires curiosity, innovation and growth.

AI-Powered Learning Experience

Smart technology, personalised learning and real-world applications.

Elite Selection Process (CBNEST)

A merit-based process to identify and nurture tomorrow's change makers.

The CBSOT journey: Our Vision and Mission

An SOT built by people who've taught tech for more than twelve years. We're not starting from zero. For more than a decade, Coding Blocks has trained engineers who now ship production code at the world's best companies. Now, we're bringing that same teaching craft, mentor culture and industry lens into a full B.Tech degree.

2014

FIRST CLASSROOM OPENS

Coding Blocks starts in a small Delhi classroom with one promise to teach code the way engineers actually write it.

1 room · **25** students

2017

IN-HOUSE TECH PRODUCTS LAUNCHED

Launched our own Online Portal, Online, IDE and Hackerblocks where students could code, learn and ace development.

25,000+ learners shipped

2019

LIVE ONLINE COHORTS · 10× REACH

The CB method goes nationwide. Live classes, live code reviews, live mentors, students could now learn live from mentors as well as pre-recorded videos.

PAN-India cohorts live

2022

150,000+ ENGINEERS 400+ HIRING PARTNERS

CB alumni are now shipping at Google, Microsoft, Amazon, Razorpay, Swiggy and founding the next wave.

150,000+ alumni network

2024

CB PARTNERED WITH 25+ UNIVERSITIES

Coding Blocks started to deliver the teaching craft in top 25+ universities, to change the traditional education and preparing students who are ready to code from day 1.

B.Tech game changer

2026

CBSOT LAUNCHED

Coding Blocks launched it's first school of technology to craft the next wave of developers who are going to revolutionize the IT industry with AI.

The 6 Pillars powering industry ready students at CBSOT

Our 4-year residential B.Tech program in Computer Science and Artificial Intelligence is designed to prepare students for success in a rapidly evolving tech landscape. By seamlessly integrating strong theoretical foundations with hands-on, real-world experience, the program equips learners with the skills, knowledge, and industry readiness needed to excel from day one.

Code from Day one

Student Achievements at a glance

At Coding Blocks, we take immense pride in our students' achievements and their unwavering drive for excellence. From securing internships at leading tech companies to excelling in coding competitions and representing CB on global platforms, our students continue to set new benchmarks of success.

"AI is not a subject here.
It's the language we think in."

OUR RECENT ACHIEVERS

Google Summer of Code

Google Summer of Code (GSoC) is a global, Google program that pairs aspiring developers with mentors for a funded summer coding project. Highly competitive with only 1200 contributors selected each year from 15000 applicants worldwide, GSoC has helped launch the careers of developers across 130+ countries, making it one of the most prestigious gateways in the community.

Google Big Code 2026

Google Big Code is Google India's flagship national coding challenge for engineering students. The 2026 edition drew over 1,25,000 participants through a rigorous five-round elimination process, culminating in an AI-themed hackathon and live finale at Google's Bengaluru office. Open to 1st, 2nd, and pre-final year students, the competition rewards the top 10, gifts Google Pixel devices to the top 50 finalists, and puts India's brightest young coders directly on Google's radar.

What Makes CBSOT Unique?

Traditional Colleges vs Coding Blocks School of Technology

TRADITIONAL B.TECH

Theory-heavy, outdated, disconnected

DSA starts in Year 3

DSA starts in Year 3, Two years lost to pure theory before students touch a real Data structure.

College syllabus aligned Mentors

Regular College syllabus, Mentors and Professors with less to no experience in the IT industry.

Exam-first, skill-last

Many students enter college without knowing which skills truly matter. They discover opportunities like GSOC, ACM ICPC, top internships and placements only after the right preparation window has started closing. By then, they realise that success is skill-based, not something achieved at the last minute. Without early guidance and a clear roadmap, many end up missing valuable opportunities.

Zero industry exposure

Limited overall development, limited to no access to Coding clubs, Internships, Hackathons, Research etc.

AI is a Year-3/4 elective

Usual colleges consider AI as an elective and as an engineer, you would never be able to meet the industry standards that is a must in today's AI age.

Missing Startup ecosystem

No Entrepreneurship orientation, Accelerators, Combinators.

VS

CB SCHOOL OF TECHNOLOGY

Practical-first, mentor-led, career-aligned

Coding & DSA from Day 1

DSA and coding starts right from Day 1, ship your first app by Month 3 - no waiting, gone are those boring years.

Industry aligned Mentors

Industry experienced and oriented mentors with exposure to IT industry projects, best practices and modus of working.

Skill-First, Intern-First, Profile-First

At CBSOT, we start from the beginning, we follow a clear roadmap built around real skills, strong fundamentals, competitive coding, projects, internships and placement readiness. With the right mentorship and industry-focused learning, students prepare for opportunities like GSOC, ACM ICPC, top internships and leading tech roles before the window even starts.

Complete Industry and Tech Exposure

Exposure to Hackathons as a part of the curriculum, foreign university programs and visits, Open source, GSOC, LFX, Coding clubs like GDG and Student chapters, Research papers, patents and much more.

AI woven into every year

AI in Year 1 to building an LLM by Year 3. Graduate to lead AI age and not to catch it up.

Startup as a Career

50 lacs fund for Entrepreneurship club, Combinators, resources for those who want to be Employers rather than employee.

AI-Infused Curriculum Outline

Think like an engineer

Year 1

Programming, Data structures and algorithms, building web applications using GenAI/ Agentic AI and the discipline of building real things.

SUBJECTS

Programming & Logic
C++ & Python · Mastering Programming

Math for Data science
Discrete math · probability · Statistics

Web Development
HTML · CSS · JavaScript · MERN Stack

Linux & Git
Shell · version control · project collaboration

Databases (DBMS)
SQL · schema design · indexing

Operating Systems
Processes · threads · memory · IO

Intro to Data Science
Python · Gen AI · Agentic AI

Industry Projects
Build 4+ applications, end-to-end

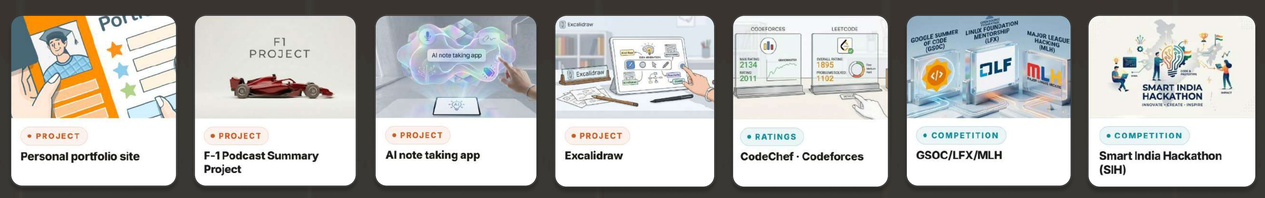
TECH STACK

YOU'LL WALK OUT WITH

- 4+ projects Web applications and GenAI
- Strong GitHub profile
- 350+ problems solved
- Great chances to crack GSOC and Top Hackathons
- ACM-ICPC Participation
- Profile building on Codeforces and Leetcode

WHAT YOU'LL BUILD

Projects, Ratings, Competition



Build like an engineer

Year 2

CP, Machine Learning, Deep Learning and Advanced technologies with weekly code reviews and production-grade projects.

SUBJECTS

Machine Learning
Linear Regression · Supervised & Unsupervised Learnings · Advanced Algorithms

Competitive Programming
DP · greedy · graph algorithms

Advanced Web Development
VUEJS · TypeScript · Projects

System Design-1
scalability · trade-offs

Computer Networks
TCP/IP · HTTP · sockets · DNS

Intro to Deep Learning
Transformers · classification · models

Cloud & DevOps
AWS · Docker · CI/CD · monitoring

Interview & Preparation
DSA · Problem Solving

TECH STACK

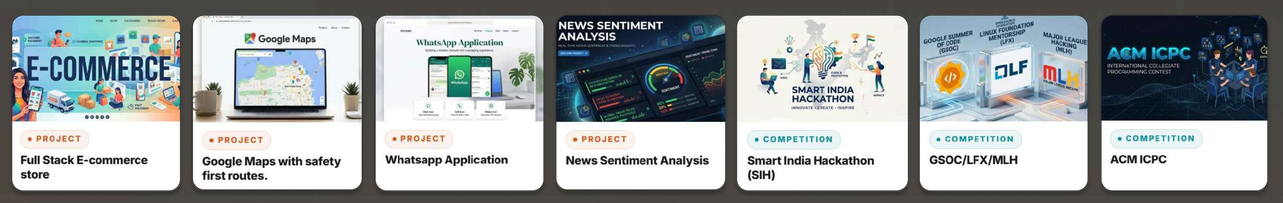
Machine Learning · Deep Learning · Artificial Intelligence · VUEJS · NEXTJS · NODEJS · TypeScript · PostgreSQL · Redis · Docker · Postman · AWS · LLMs · System Design

YOU'LL WALK OUT WITH

- 4+ AI powered web applications
- Build your own Startup
- Get a paid internship
- Winning Top Companies Hackathons
- Mock Interviews and Bootcamps with Industry Leaders
- 600+ DSA questions on Codeforces/Leetcode

WHAT YOU'LL BUILD

Projects, Ratings, Competition



AI-Infused Curriculum Outline

Ship like an engineer

Year 3

Cybersecurity. Blockchain, System Design(HLD) and Building LLMs and SEO engines.

SUBJECTS

Applied ML / DL
PyTorch · CNNs · RNNs · transformers

Generative AI & LLMs
RAG · agents · fine-tuning · evals

Introduction to Java
JVM · Objects · Core Java

Computer Vision
OpenCV · YOLO · segmentation · object detection

Blockchain
Solidity · Bitcoin · Wallet

System Design-2
scalability · trade-offs

MLOps
MLflow · model serving · CI/CD for ML · drift detection

Advanced Java
Spring · Hibernate

Interview Preparation
DSA · design rounds · mocks

TECH STACK

Applied ML Flask Generative AI Scaling Big Data Interview Prep Competitive Coding Java Spring Boot Hibernate Computer Vision Blockchain Projects Portfolio Consulting

YOU'LL WALK OUT WITH

- Production-ready engineering skills
- Global OSS selection (GSOC · LFX · MLH)
- End-to-end AI products like Search Engine
- Strong Codeforces profile for top product companies
- Strong system design thinking
- Work to raise funding for your startup

WHAT YOU'LL BUILD

Pick your launchpad

Year 4

Cloud Computing, .Net, Research Papers and Placement Preparation to make you industry ready.

SUBJECTS

Cloud Computing
AWS · GCP · Azure · serverless · IaC · Terraform

.NET Development
ASP.NET Core · C# · Entity Framework · Web APIs

Data Engineering
Pipelines · ETL · warehousing · BI

Research & Development
Publications · Research Work

Interview Preparation
DSA · design rounds · mocks · behavioural

Electives
Internship · Industry Preparation

TECH STACK

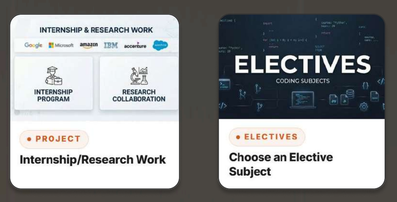
IaC Terraform ASP.NET Core Data Warehousing C# BI Publications Research Work Mock Interviews Career Readiness

YOU'LL WALK OUT WITH

- Production-ready engineering skills across ML, Cloud & Backend
- Publish research paper in Data Science, MLOps or Cloud Computing
- End-to-end AI products ready for deployment
- Strong Codeforces profile for top product companies
- Strong system design thinking for senior engineering roles
- Dedicated Placement Preparation

WHAT YOU'LL BUILD

Projects



Learn from our expert faculty & mentors

We are proud to have a distinguished team of expert faculty and mentors who bring a wealth of knowledge and experience from top universities and leading tech companies. Their expertise and guidance are instrumental in shaping our students into industry ready professionals.

"We don't just teach AI, we teach you to think with it, build with it, and lead with it."

Two paths. One destination.

Clear the CBNEST (Coding Blocks National Entrance & Scholarship Test) or qualify directly on the strength of your academic profile. Either way you meet the admissions team for an interview and a counselling conversation for you and your parents.

Eligibility Criteria- Path A · via CBNEST

Clear the CBNEST and interview.

The default route for most applicants. A thoughtful 2-hour aptitude test , fair across boards and streams, followed by a counselling interview.

1 — Register online
5-minute form, campus preference, Class 12 marksheet.

2 — Take the CBNEST
2-hour aptitude test, online or at an offline centre.

3 — Interview round
A 30-minute counselling & motivation conversation.

4 — Offer & scholarship
within 72 hours of your interview.

Best for: Any Class 12 student or dropper · science stream · 60%+ aggregate · any board · no prior coding knowledge needed.

Eligibility Criteria- Path B · Profile-based

Skip the test, go straight to interview.

For students with consistently strong academic records, top-tier board scores, or outstanding achievements. You can skip the CBNEST entirely and go directly to the interview round.

1 — Register online
and upload your Class 10 & 12 marksheets plus any achievements.

2 — Profile review
our admissions team evaluates your record within 48 hours.

3 — Direct interview
if shortlisted, you skip the CBNEST and go straight to the interview round.

4 — Offer & scholarship
decision within 72 hours after the interview.

Shortlisted if: Class 10 & 12 aggregates both 90%+ · OR JEE Main percentile 90+ · OR a verified top-tier olympiad / hackathon / open-source / published-work record.

100% merit-based.
No capitation. No quotas. If you have the passion to build, you belong here.

Application process

Coding Blocks National Entrance & Scholarship Test (CBNEST) is official test to get into Coding Blocks School of Technology.

Register online

1

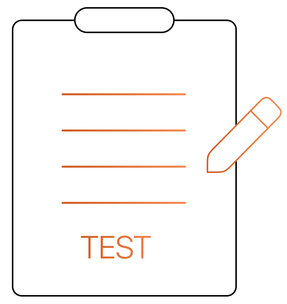
5-minute form · Campus preference · Profile.

≈ 5 min

Take the CBNEST

2

2-hour aptitude test · online or at an offline centre of your choice.

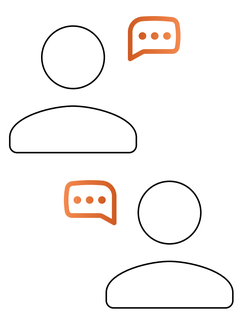


2 hours

Interview round

3

A 30-minute counselling & motivation conversation with our Admissions team.

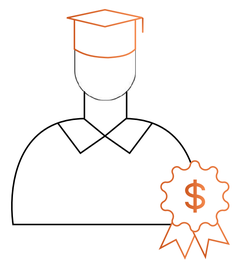


30 min

Offer & scholarship

4

Personalised offer letter with your scholarship within, 72 hours of your interview

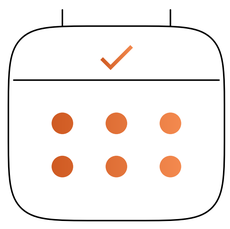


≤ 72 hours

Block your seat

5

Pay a refundable seat-blocking fee & confirm your campus, Greater Noida or Panipat.



Refundable

Welcome to CBSOT

6

Orientation day, meet your cohort, pick up your laptop, and start Semester 1, Class of 2030 begins.

Batch 2026

Scholarships

Scholarships are earned on merit, strong CBNEST performance, exceptional academics or verified olympiad / national-level achievements. No interviews with founders, no subjective calls. Applied on the tuition component of your fee, confirmed with your offer letter.

☆ Top merit

Merit · Summit

Full tuition waiver for the highest-performing applicants of the cycle.

Eligibility -

Top 1% CBNEST score or a verified medal at an International-level olympiad (IMO, IPhO, IChO, IOI, IBO).

Up to 100%

Olympiad & national

Olympiad Excellence

For national-level olympiad & competition medallists who round out their CBNEST with a strong interview.

Eligibility -

INMO/INChO/INPhO/INBO qualifier, KVPY fellow, NTSE scholar, or a national-level medal — plus CBNEST Top 5%.

Up to 50%

✓ Strong performer

Merit · Distinction

The scholarship most strong-profile applicants qualify for. Rewards consistent academic excellence.

Eligibility -

CBNEST performers · or High score in Class 12 board · or JEE Main High-percentile.

Up to 25%

Inclusion

Young Girl Techies

Stackable additional waiver for women in tech — combinable with the merit tier you qualify for.

Eligibility -

Female applicants who also clear CBNEST (any tier). Stacks on top of your merit scholarship.

Up to 25%

$ Need based

Need based Scholarship

Additional Scholarship for those who need it genuinely.

Eligibility -

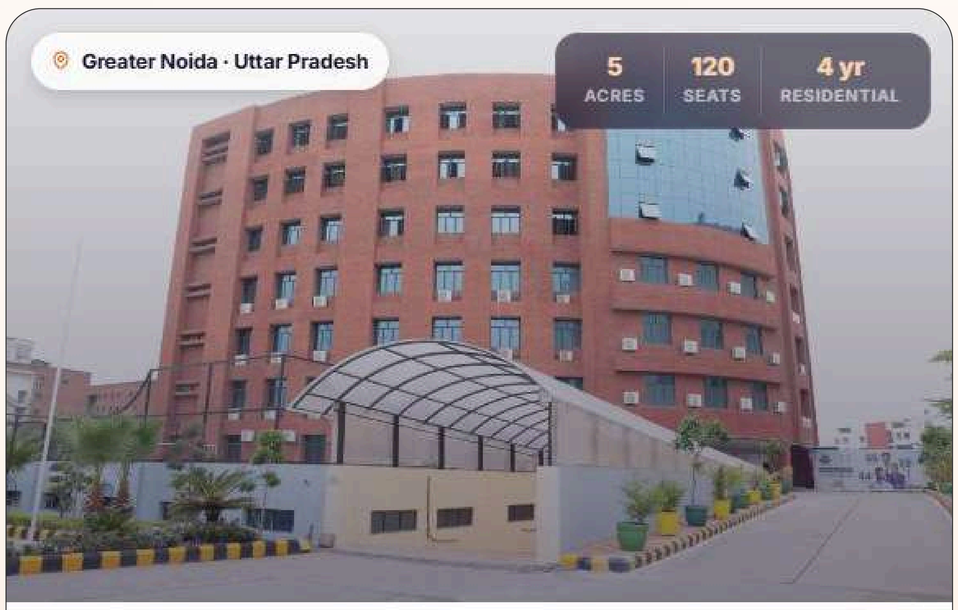
Students from EWS or lower Income group families deserving scholarship in fees.

Up to 10%

How it works: Scholarships are applied on the tuition component of your fee. Only one merit tier can be claimed at a time, the highest tier you qualify for is awarded automatically. The Young Girl Techies waiver stacks additionally. Full terms ship with your offer letter. For the complete fee sheet, see the **program page**.

Two campuses. One CBSOT. Where will you build?

At Coding Blocks School of Technology, education goes beyond the classroom. Our campuses established through partnerships with **Geeta University in Panipat** and **GLA University in Gr. Noida** are uniquely designed to foster holistic learning and development for bright, young minds.



GLA University · Noida

CITY CAMPUS

For builders who want the city's pulse — startup meetups, weekend hackathons, and direct access to India's largest tech corridor.

- AC residential hostels
- 24×7 coding labs & GPU cluster
- Full residential · 24×7 mess
- 35 min from IGI airport

Geeta University · Panipat

GREEN CAMPUS

For deep-focus builders, a 40 acre residential campus on NH 44 where you'll ship code alongside your cohort, far from the city's noise.

- AC residential hostels
- 24×7 coding labs & GPU cluster
- Full residential · 24×7 mess
- 90 min from Delhi on NH-44

QUICK COMPARE	GLA University, Greater Noida	Geeta University, Panipat
Vibe	City · startup-dense	Quiet · deep-focus
Campus size	5 acres	40 acres
Best for	Networking & meetups	Flow state & cohort life
Nearest airport	IGI · 35 min	IGI · 90 min

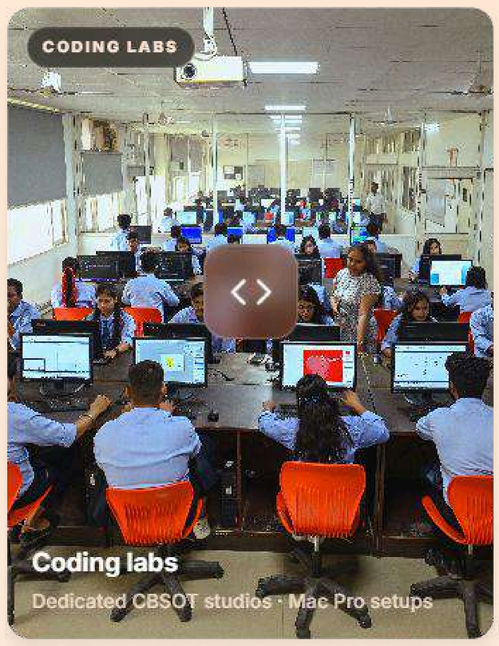
Both campuses run the exact same curriculum, mentor pool and CB craft. The choice is about where you want to live for four years, city hustle or a quiet builder's campus.

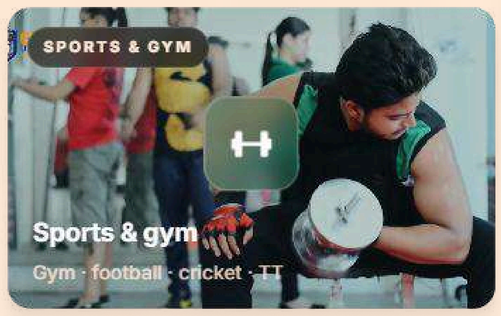
GEETA UNIVERSITY

Panipat (Delhi NCR)

Geeta University is India's first and only Impact University, aiming to create impactful leaders through a blend of Indian, global, and futuristic education. The university's vision is guided by leading academic scholars, industry mentors, and social and spiritual leaders.

CBSOT, Panipat
A World class learning environment





FEE STRUCTURE · 8 SEMESTERS · GEETA PANIPAT

Every rupee, semester by semester.

Core program fees · University-levied / may vary

Particulars	Sem 1	Sem 2	Sem 3	Sem 4	Sem 5	Sem 6	Sem 7	Sem 8
Tuition Fee	₹ 1,35,000	₹ 1,35,000	₹ 1,35,000	₹ 1,35,000	₹ 1,35,000	₹ 1,35,000	₹ 1,35,000	₹ 1,35,000
Development Fee	₹ 60,000	₹ 60,000	₹ 60,000	₹ 60,000	₹ 60,000	₹ 60,000	₹ 60,000	₹ 60,000
Annual Student Facility Chai	*₹ 10,000*	*₹ 1,500*	*₹ 10,000*	*₹ 1,500*	*₹ 10,000*	*₹ 1,500*	*₹ 10,000*	*₹ 1,500*
Examination Fee	*₹ 2,500*	*₹ 2,500*	*₹ 2,500*	*₹ 2,500*	*₹ 2,500*	*₹ 2,500*	*₹ 2,500*	*₹ 2,500*
Hostel Fee (AC 3 Sharing)	*₹ 75,000*	*₹ 75,000*	*₹ 75,000*	*₹ 75,000*	*₹ 75,000*	*₹ 75,000*	*₹ 75,000*	—
Total	**₹ 2,82,500**	**₹ 2,74,000**	**₹ 2,82,500**	**₹ 2,74,000**	**₹ 2,82,500**	**₹ 2,74,000**	**₹ 2,82,500**	**₹ 1,99,000**

4-YEAR TOTAL · WITHOUT HOSTEL

₹ 16,26,000

Tuition + Development + facility + exam fees

4-YEAR TOTAL · WITH HOSTEL (AC 3-SHARING)

₹ 21,51,000

Hostel for 7 semesters · Sem 8 excluded

IMPORTANT NOTES & ADJUSTMENTS

- **Seat block adjustment —** the ₹ 50,000 seat-block amount is fully adjusted against the Semester 1 fee on joining.
- **Internship-semester waivers —** hostel & mess fees are not applicable during University-approved internship semesters when the learner is not residing on campus. That's why Sem 8 shows no hostel fee above.
- **Laptop (MacBook) —** if opted through CBSOT, billed at MRP with or before the Sem 1 fee deadline. Subsidised pricing may be available. Latest model issued, subject to availability. Final details will be shared with admits soon.
- **University-levied charges —** the partner university may separately levy additional charges — examination fees, backlog fees, convocation, uniform/blazer and other university-related charges — which are **not included** in the program fees shown above.
- **Indicative figures —** indicative for the 2026 batch and confirmed by the university partner during admissions. Scholarships are applied on the tuition component.

GLA UNIVERSITY

Greater Noida

GLA University was established nearly three decades ago with a clear focus on quality education, discipline, and employability. Over the last 28 years, GLA has evolved into one of North India's most trusted university brands, particularly known for its placement performance and strong industry relationships.

CBSOT, Greater Noida
A World class learning environment

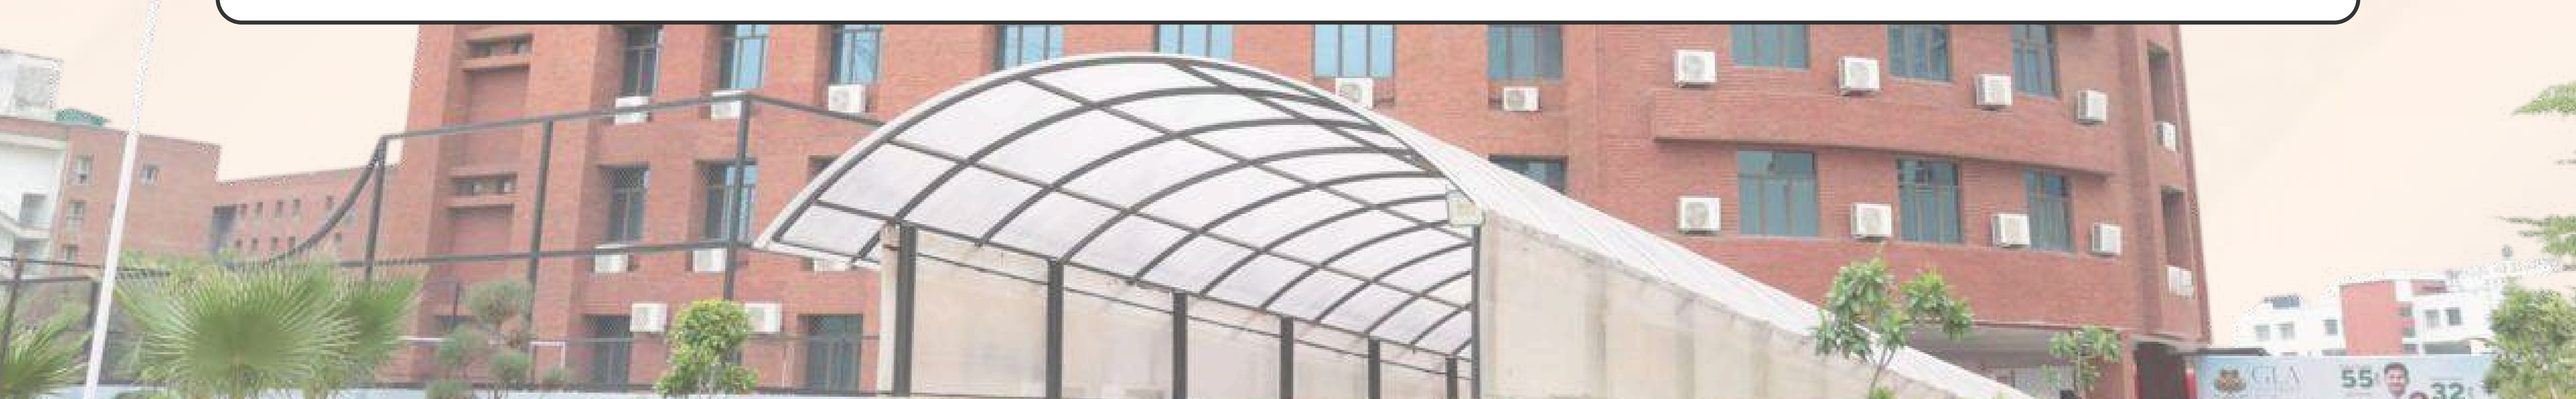
IMPORTANT NOTES & ADJUSTMENTS

- **Seat block adjustment —** the ₹ 50,000 seat-block amount is fully adjusted against the Semester 1 fee on joining.
- **Internship-semester waivers —** hostel & mess fees are not applicable during University-approved internship semesters when the learner is not residing on campus. That's why Sem 8 shows no hostel fee above.
- **Laptop (MacBook) —** if opted through CBSOT, billed at MRP with or before the Sem 1 fee deadline. Subsidised pricing may be available. Latest model issued, subject to availability. Final details will be shared with admits soon.
- **University-levied charges —** the partner university may separately levy additional charges — examination fees, backlog fees, convocation, uniform/blazer and other university-related charges — which are **not included** in the program fees shown above.
- **Indicative figures —** indicative for the 2026 batch and confirmed by the university partner during admissions. Scholarships are applied on the tuition component.



Future-ready learning infrastructure

Building the next generation of innovators

At CBSOT, learning extends far beyond traditional classrooms. Our advanced innovation spaces are designed to inspire creativity, experimentation, collaboration and hands-on problem solving. From intelligent AI systems to robotics engineering and collaborative digital learning environments, students gain exposure to future technologies from an early stage.

INNOVATE	COLLABORATE	CODE	TRANSFORM
Creative Thinking	Teamwork & Synergy	Build the future	Ideas into impact

Computer labs

Smart digital learning ecosystem

Our high-performance computer labs are equipped with modern system, high-speed connectivity, and industry- relevant software tools that enable students to explore coding, digital design, programming, simulations and research-based learning.

1. Advanced computer systems with high-speed internet.
2. Coding and programming practice environments.
3. Interactive smart-learning software.
4. Digital research and project development support
5. Technology-integrated classroom experiences.

AI labs

Exploring intelligence beyond imagination

The CBSOT AI Lab introduces students to the world of Artificial Intelligence, Machine learning, Data Science and smart automation. The lab encourages students to think critically, innovate fearlessly and understand how intelligent technologies are transforming the future.

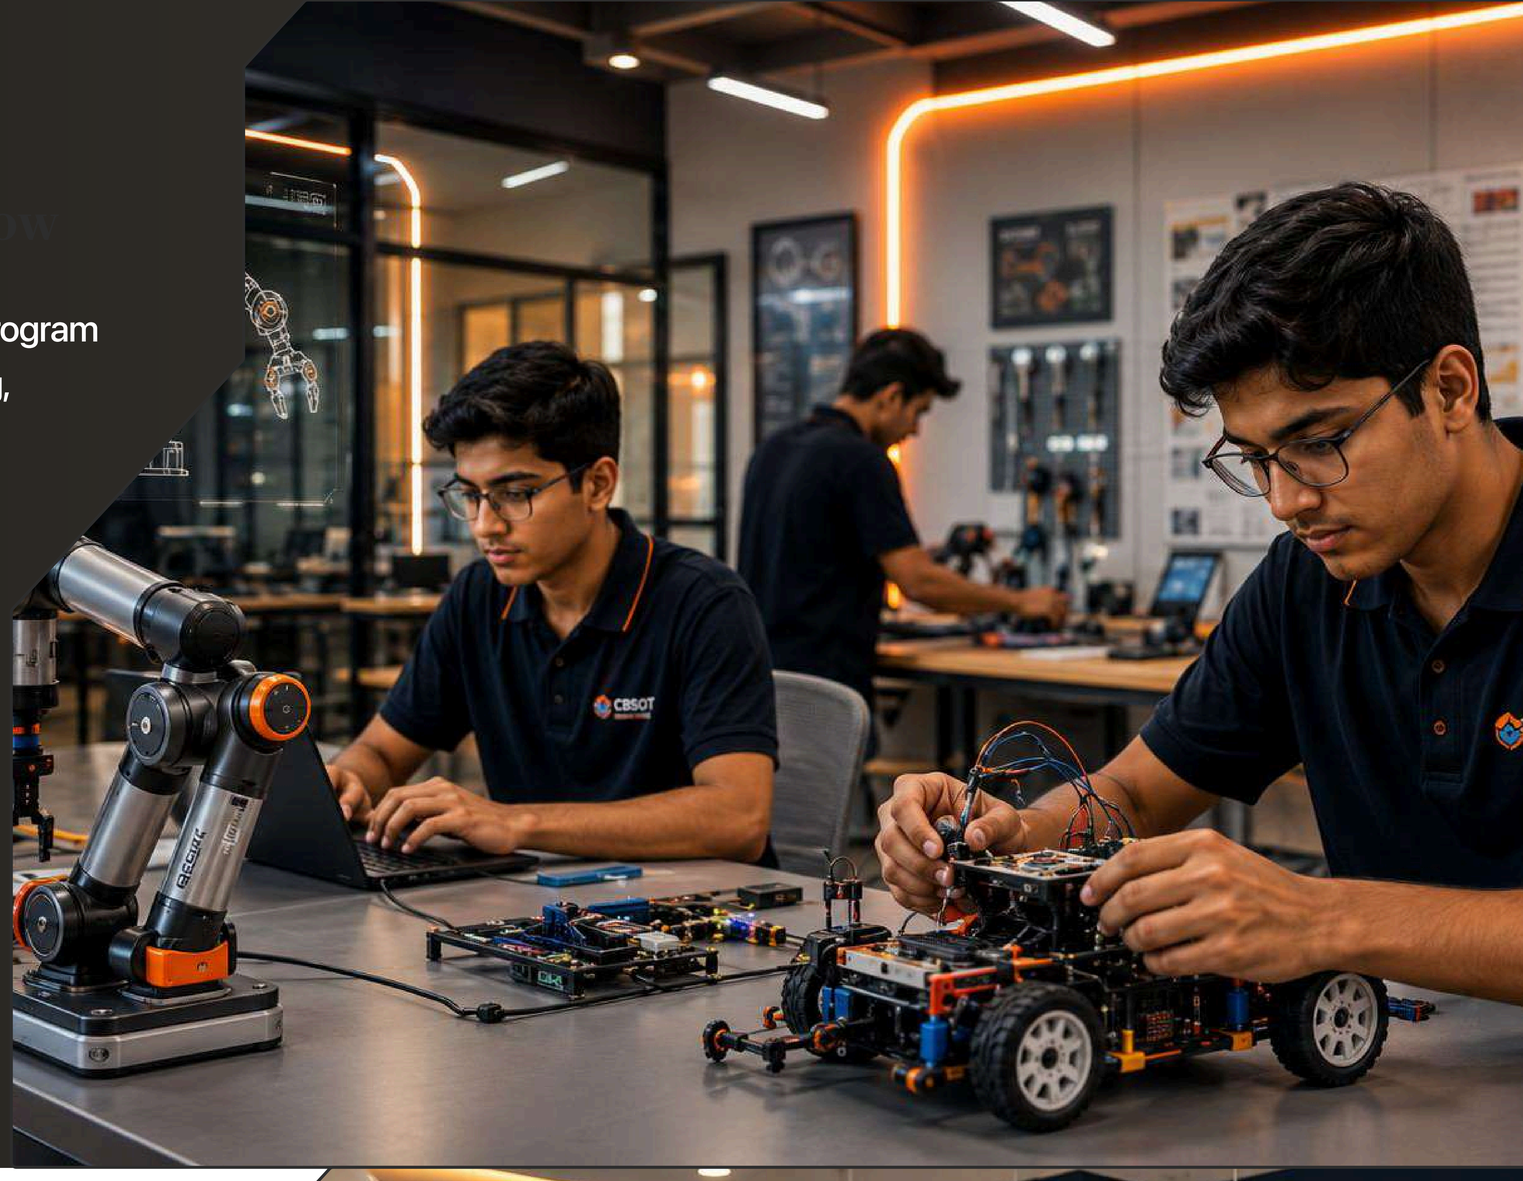
1. Introduction to Artificial Intelligence concepts.
2. Machine Learning and Automation activities.
3. Real-World technology applications.
4. AI-Powered project building and experimentation.

Robotics labs

Designing the technology of tomorrow

The robotics lab empowers students to design, build and program intelligent robotic systems while developing logical thinking, engineering fundamentals, and real-world problem solving skills.

1. Hands-on robotics and automation learning.
2. Sensor-based and programmable robotics kits.
3. STEM-focused practical experiences.
4. Innovation challenges and collaborative projects.
5. Creative engineering and design thinking activities.

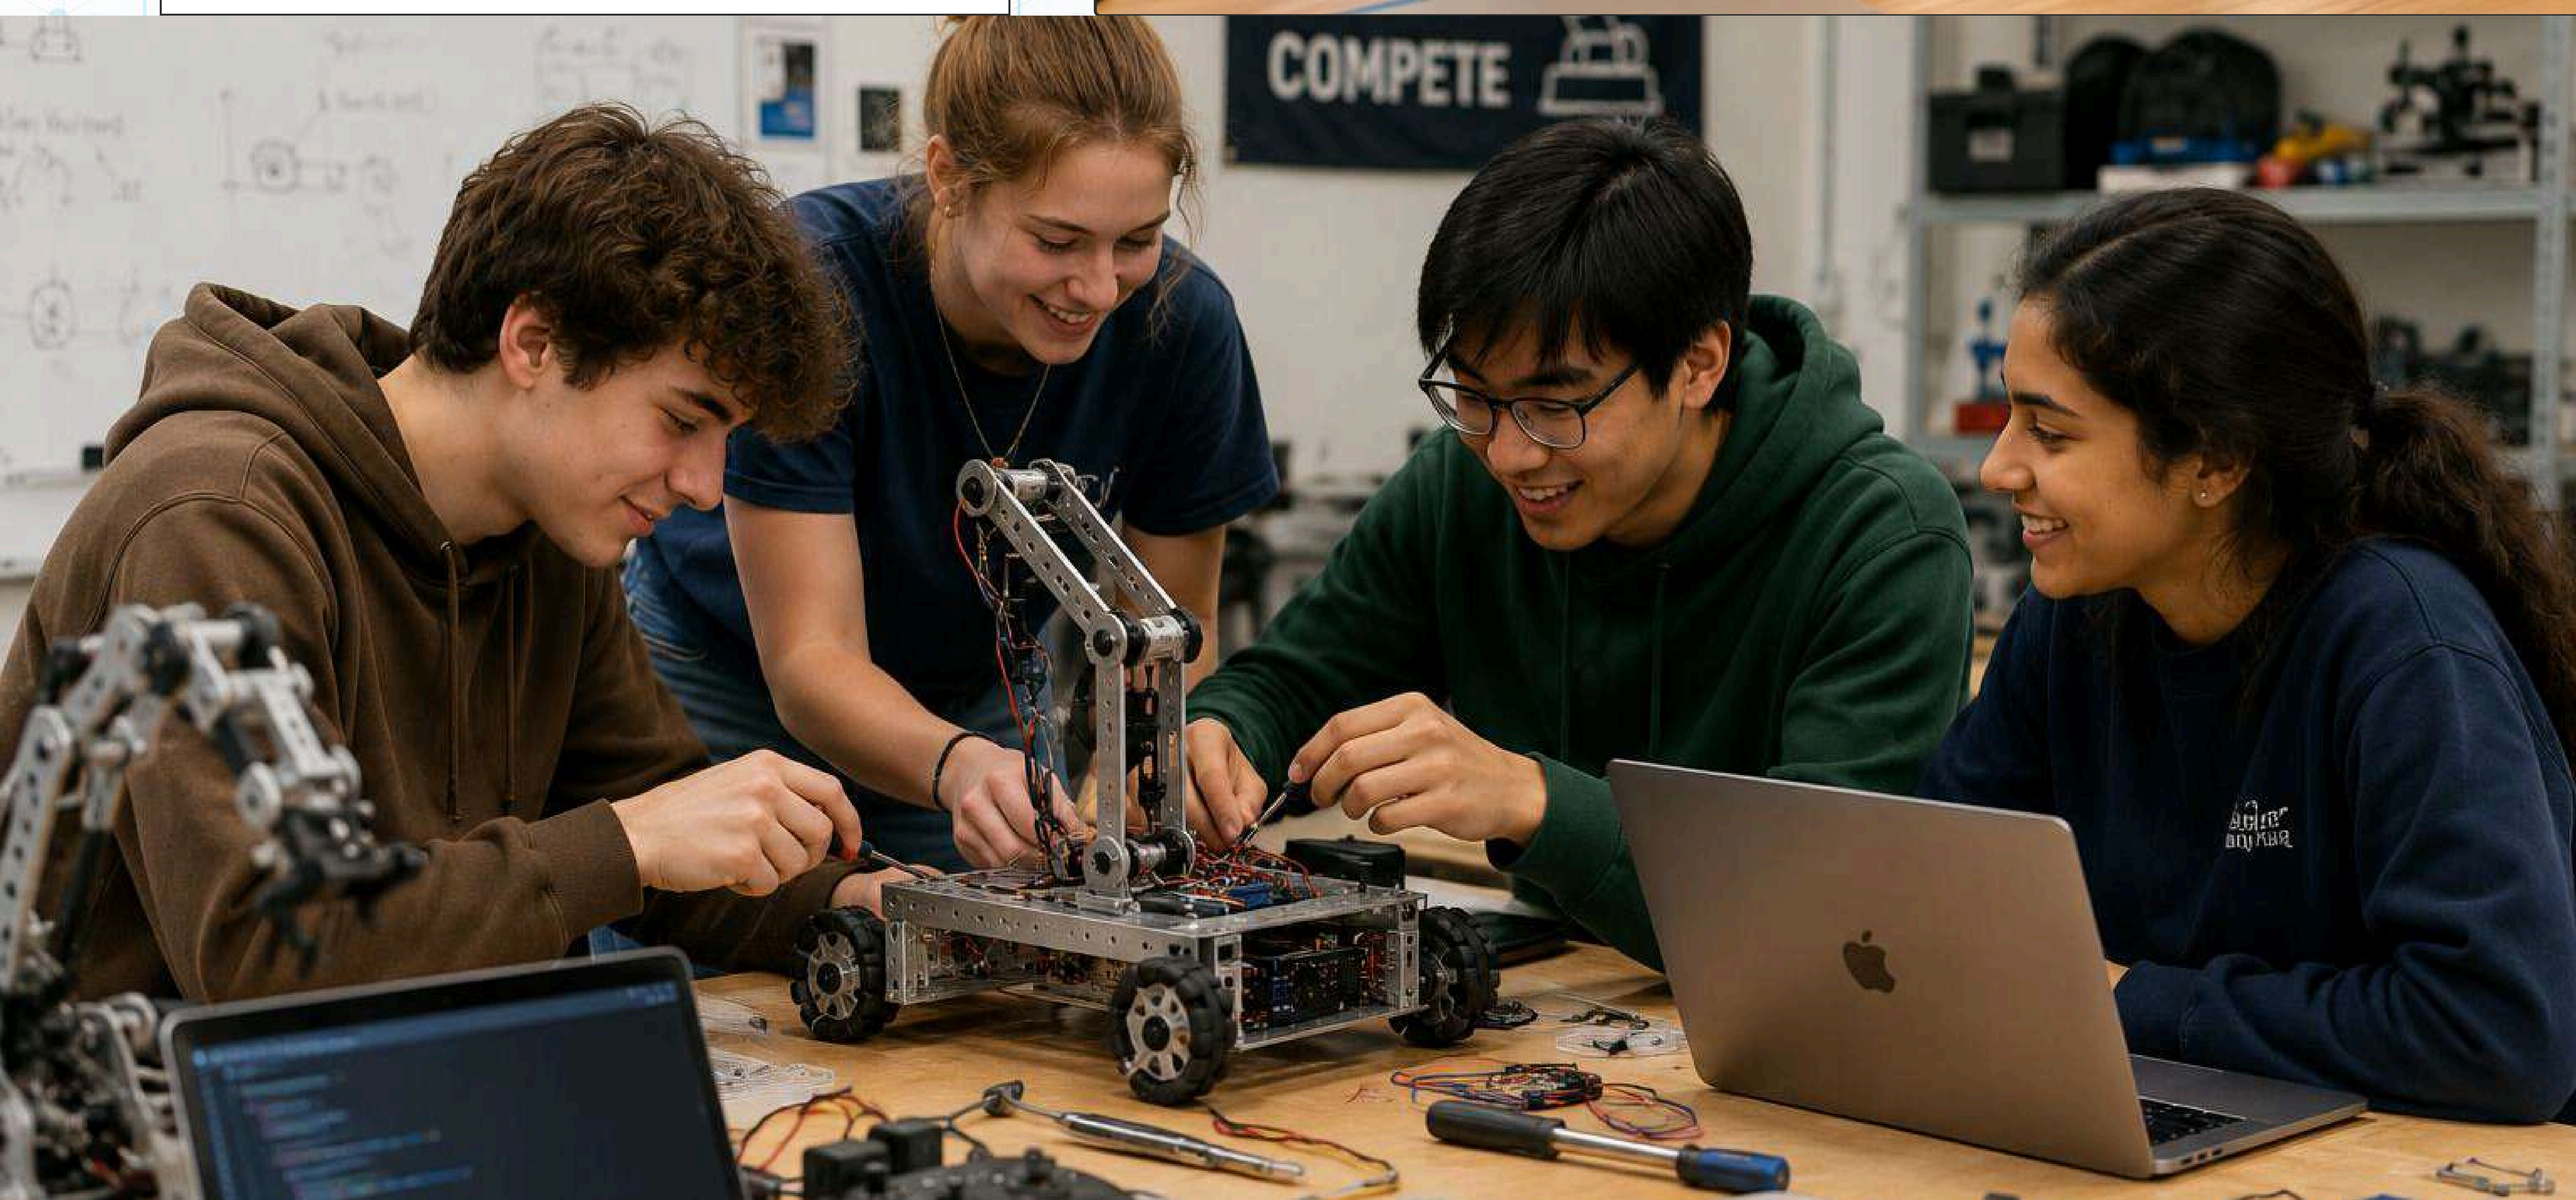


Collaborative learning spaces

Where ideas connect and creativity grows

Our collaborative learning spaces are designed to promote teamwork, communication, creativity, and experiential learning. These flexible environments encourage students to brainstorm, discuss, innovate, and learn together.

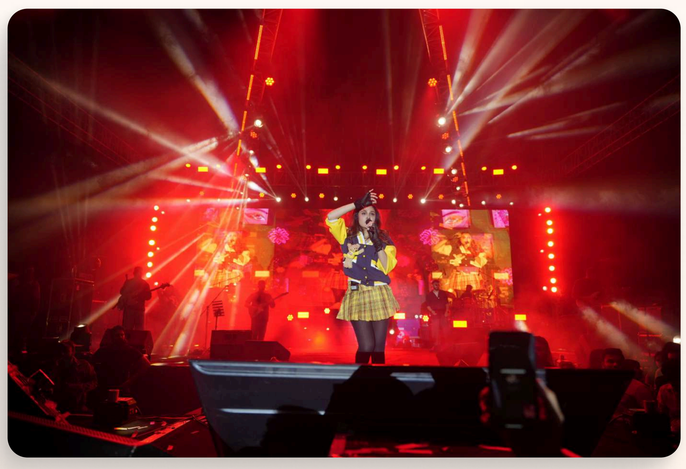
1. Open and flexible learning environment.
2. Group project and innovations corner.
3. Creative brainstorming spaces.
4. Interactive smart boards & discussion Zones.



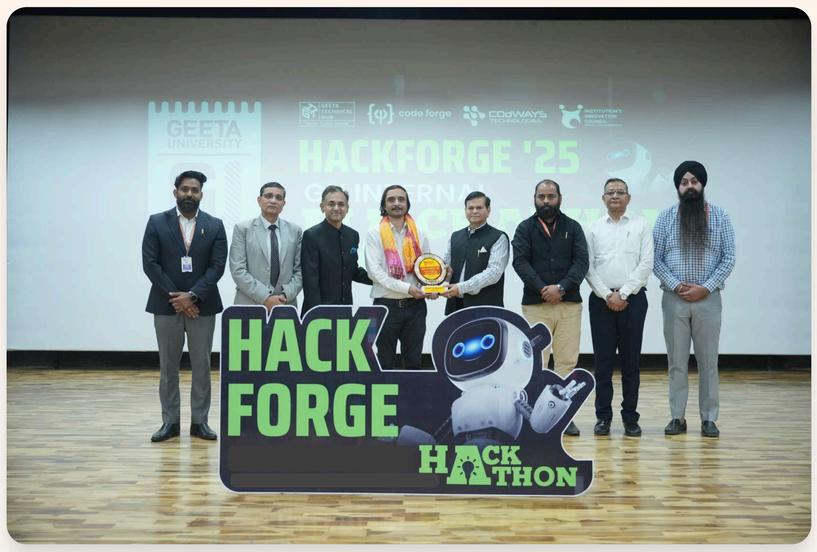
Life and Studies at CBSOT

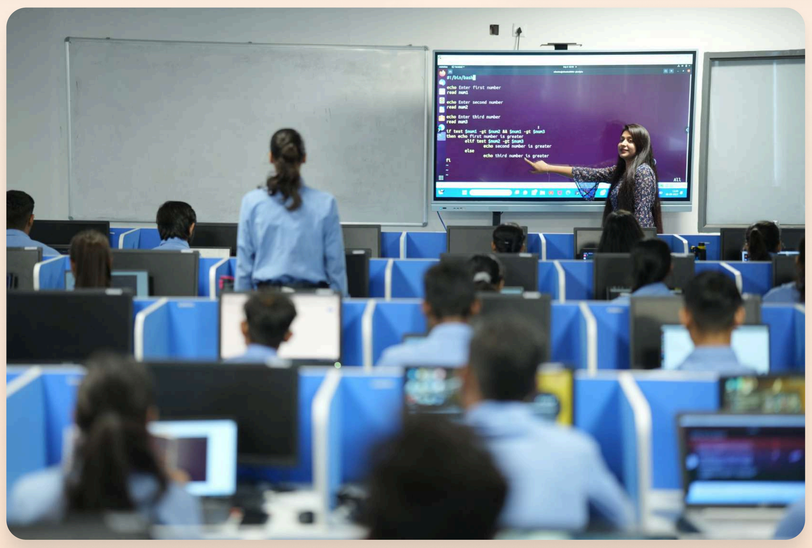
At CBSOT, student life is shaped by a balance of academics, innovation, creativity and community engagement. Beyond classrooms and labs, students participate in hackathons, technical clubs, cultural events, workshops, sports and collaborative activities that encourage both personal and professional growth.

CULTURAL FEST



Life and Studies at CBSOT





> At CBSOT, everyday is an opportunity to learn, build, collaborate and grow.
>
> **You don’t just study here. You build your future here.**

Your 24/7 personal lab

Apple MacBook

Optional · via CBSOT partner pricing

- Billed at MRP with/before Sem 1 fee deadline
- Subsidised pricing may be available
- Latest model issued, subject to availability
- Final details announced to admits soon
