CODE YOUR

FUTURE

India’s best alternative to traditional CS Engineering
an industry-led programme by Classplus

The Unfair Advantage

Catapulting you to the 1% club

Not everybody gets in.

Founder's **Desk**

Welcome to Polaris School of Technology, where we're not just shaping students—**we're building the next generation of Indian tech leaders.**

At PST, we believe that life doesn't start or end at the IITs. **Your potential is far greater than a rank or a score.** In a world driven by **AI, startups, and deep tech innovation, skill is the new currency**—and traditional education isn't keeping up.

While building Classplus into a ₹5,000 crore company, we saw the gap between potential and preparedness. That's why PST Exists: To bridge the gap and create the **top 1% of tech talent**. Here, you start coding from Day 1. You build, break, and innovate in a playground designed for experimentation. We're not here to teach you what to think—we're here to teach you how to think, adapt, and lead.

The future is bold. So are you. Let's build it—together.

Our aim is to create skilled techies, and build the next generation of Indian Tech Founders backed with our experience of building Classplus.

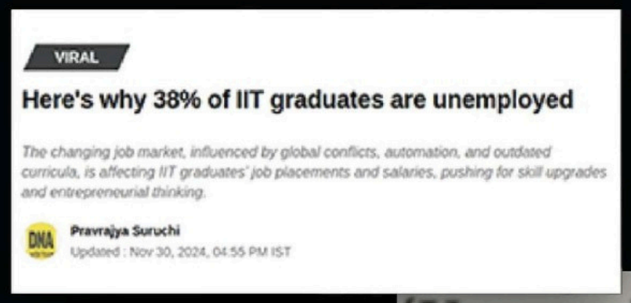
School of Technology

More than **15 Lakh students dream of engineering careers** in India every year.

They grind for the exam, hoping for a coveted seat in an IIT or NIT.



VIRAL

Here's why 38% of IIT graduates are unemployed

The changing job market, influenced by global conflicts, automation, and outdated curricula, is affecting IIT graduates' job placements and salaries, pushing for skill upgrades and entrepreneurial thinking.

'Unusual decline': 10 percentage point major drop in placement across 23 IITs

INDIA TODAY

According to a report by the Parliamentary Standing Committee, an 'unusual decline' was observed with over a 10 percentage point drop in placement across 23 Indian institutes of Technology (IIT) between the academic years 2021-22 and 2023-24.

In Short

- The parliamentary report flags over 10% drop in IIT placements
- Committee suggests enhancing employability to Education Ministry

Next wave of hiring in India will be defined not by degrees, but by demonstrable job readiness: Expert

In this changing environment, employers are shifting their focus from traditional academic qualifications to a candidate's practical skills and ability to immediately contribute to a role.

'IIT academia stuck in the past': Hotmail co-founder Sabeer Bhatia says innovation comes from doing, not just studying

The 56 year old veteran entrepreneur who is also a Stanford alumnus said that he "got into Apple on my grades, but built Hotmail by learning on the job."

Updated on: Mar 07, 2025 6:32 PM IST

By Abhyjith K. Ashokan

But the reality is brutal.

Why
Polaris School of Technology?

More than **15 Lakh students dream of engineering careers** in India every year.
They grind for the exam, hoping for a coveted seat in an IIT or NIT.
But the reality is brutal.

A single bad day, a handful of missed questions, can derail your entire future. Is your potential truly defined by that one test?

Even from top institutions, the path to success isn't guaranteed. Studies show a decline in placements, even at IITs. Landing your dream job at a tech giant isn't about pedigree - it's about having the job readiness.

PST empowers you beyond just becoming an employee. **We nurture entrepreneurs, innovators, and tech creators.**

> At PST, The University-approved curriculum emphasizes hands-on learning with 5000 hours of live coding, giving graduates a real-world work environment experience.

Traditional
VS Modern

Traditional

- Traditional colleges focus on lectures and exams, **with limited hands-on experience.**
- Many colleges lag in AI/ML courses - **curriculum is outdated as well**
- Typical colleges have purely **academic professors.**
- Older approach is **random campus interviews**; Mass placement drives

Modern

- Modern tech schools **emphasize projects, hackathons, and real code from day one.**
- Modern tech schools **update content with industry input every year.**
- **Industry experts and mentors (ex-Google, startup founders)** to teach and guide.
- **Integrates internships** during the course to ensure real work experience by graduation.

Tech is a moving target

What's hot today might be basic tomorrow. languages, frameworks, and paradigms evolve in just a few years (e.g., rise of Python, then Go, now maybe Rust or AI-specific languages).

AI Engineering will become a core skill

By 2026, every major company will embed AI into products and workflows. Roles in AI engineering, model optimization, prompt engineering, and AI integration will surge.

In 2026, AI is no longer optional.
It's a necessity.

Rise of Data Engineering

Companies prioritize clean, real-time, AI-ready data infrastructure.
Data engineering skills—pipelines, streaming, vector databases—become essential.

Continuous Learning

A future engineer must embrace continuous upskilling.
The industry will favor those who learn new skills proactively (and colleges should facilitate this).

The Future **of Tech**

02 Builders of PST

Builders of PST

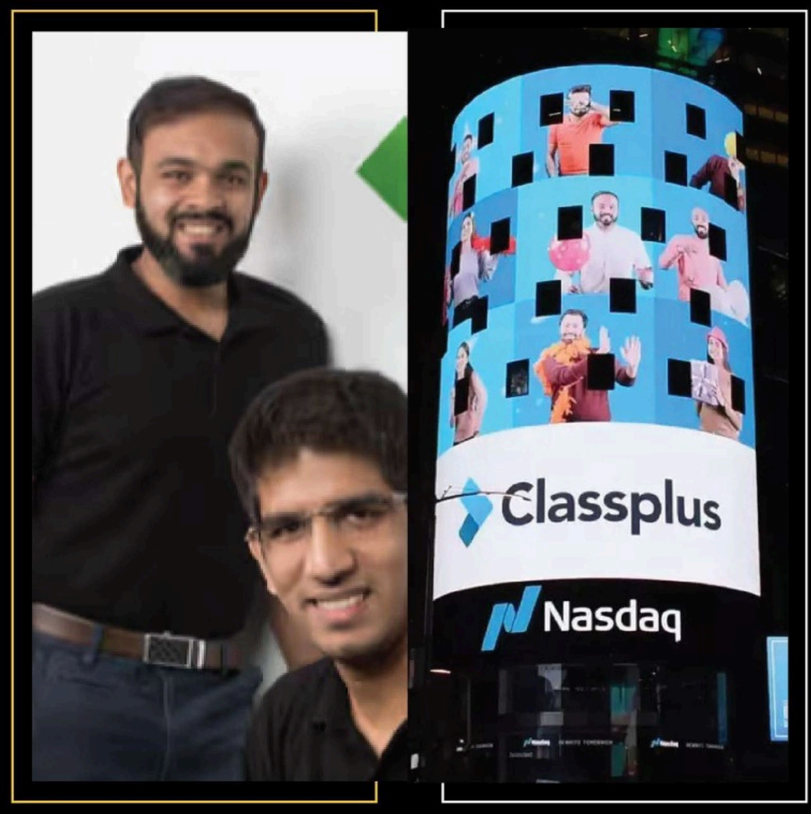
Polaris School Technology (PST) is born out of Classplus, a profitable B2B EdTech company that has been reshaping the future of education for the last eight years. Behind Classplus is a battle-tested engineering team—full-stack developers, DevOps experts, automation specialists—who have scaled a platform used by over **7 crore students**** across India.

This isn't textbook tech. This is real-world engineering—built on Node.js, Python, React, GoLang, MongoDB, Redis, Kubernetes, and yes, AI and Machine Learning. From streaming live classes to building lightning-fast apps and creator tools, our engineers have done it all.

And now, they're not just building platforms—they're building you.

January 2018

Classplus, an edtech startup, was founded by Mukul Rustagi and Bhaswat Agarwal.



Built by **Tech Titans.** Designed for the **Next Generation.**

03 Degree Overview

Degree **Overview**

Medhavi Skills University (MSU) is a UGC-recognized Skills University committed to advancing the integration of industry-aligned competencies within higher education. The University offers a 4-year Computer Science Program in Artificial Intelligence & Machine Learning (AI-ML).

Under this programme, Polaris School of Technology is engaged as an Industry Skilling Partner, facilitating the practical and experiential learning components of the University-approved curriculum at designated industry premises, in accordance with applicable academic and regulatory frameworks.

Owing to MSU's innovative skill-integrated higher education model, the University is among the first in India to:

- Promote an industry-led higher education framework
- Enable structured Learn and Earn opportunities during the degree programme

(Degree offered by Medhavi Skills University)

Industry Skilling Partner

04 Meet your **the Tech Masters:**

Meet your **Ninja Mentors**

Ninja Mentors are high-impact professionals—CEOs, CTOs, Engineering Managers—from India's top startups and global tech giants. Their fireside chats are raw, revealing sessions where students get behind-the-scenes insights into how tech giants think, build, fail, and win.

Meet your **Success Buddy**

At PST, you're not alone!

From Day 1, you'll have a dedicated Success Buddy i.e. industry experts who are invested in your success and will provide personalized counseling, growth plans and career placement support.

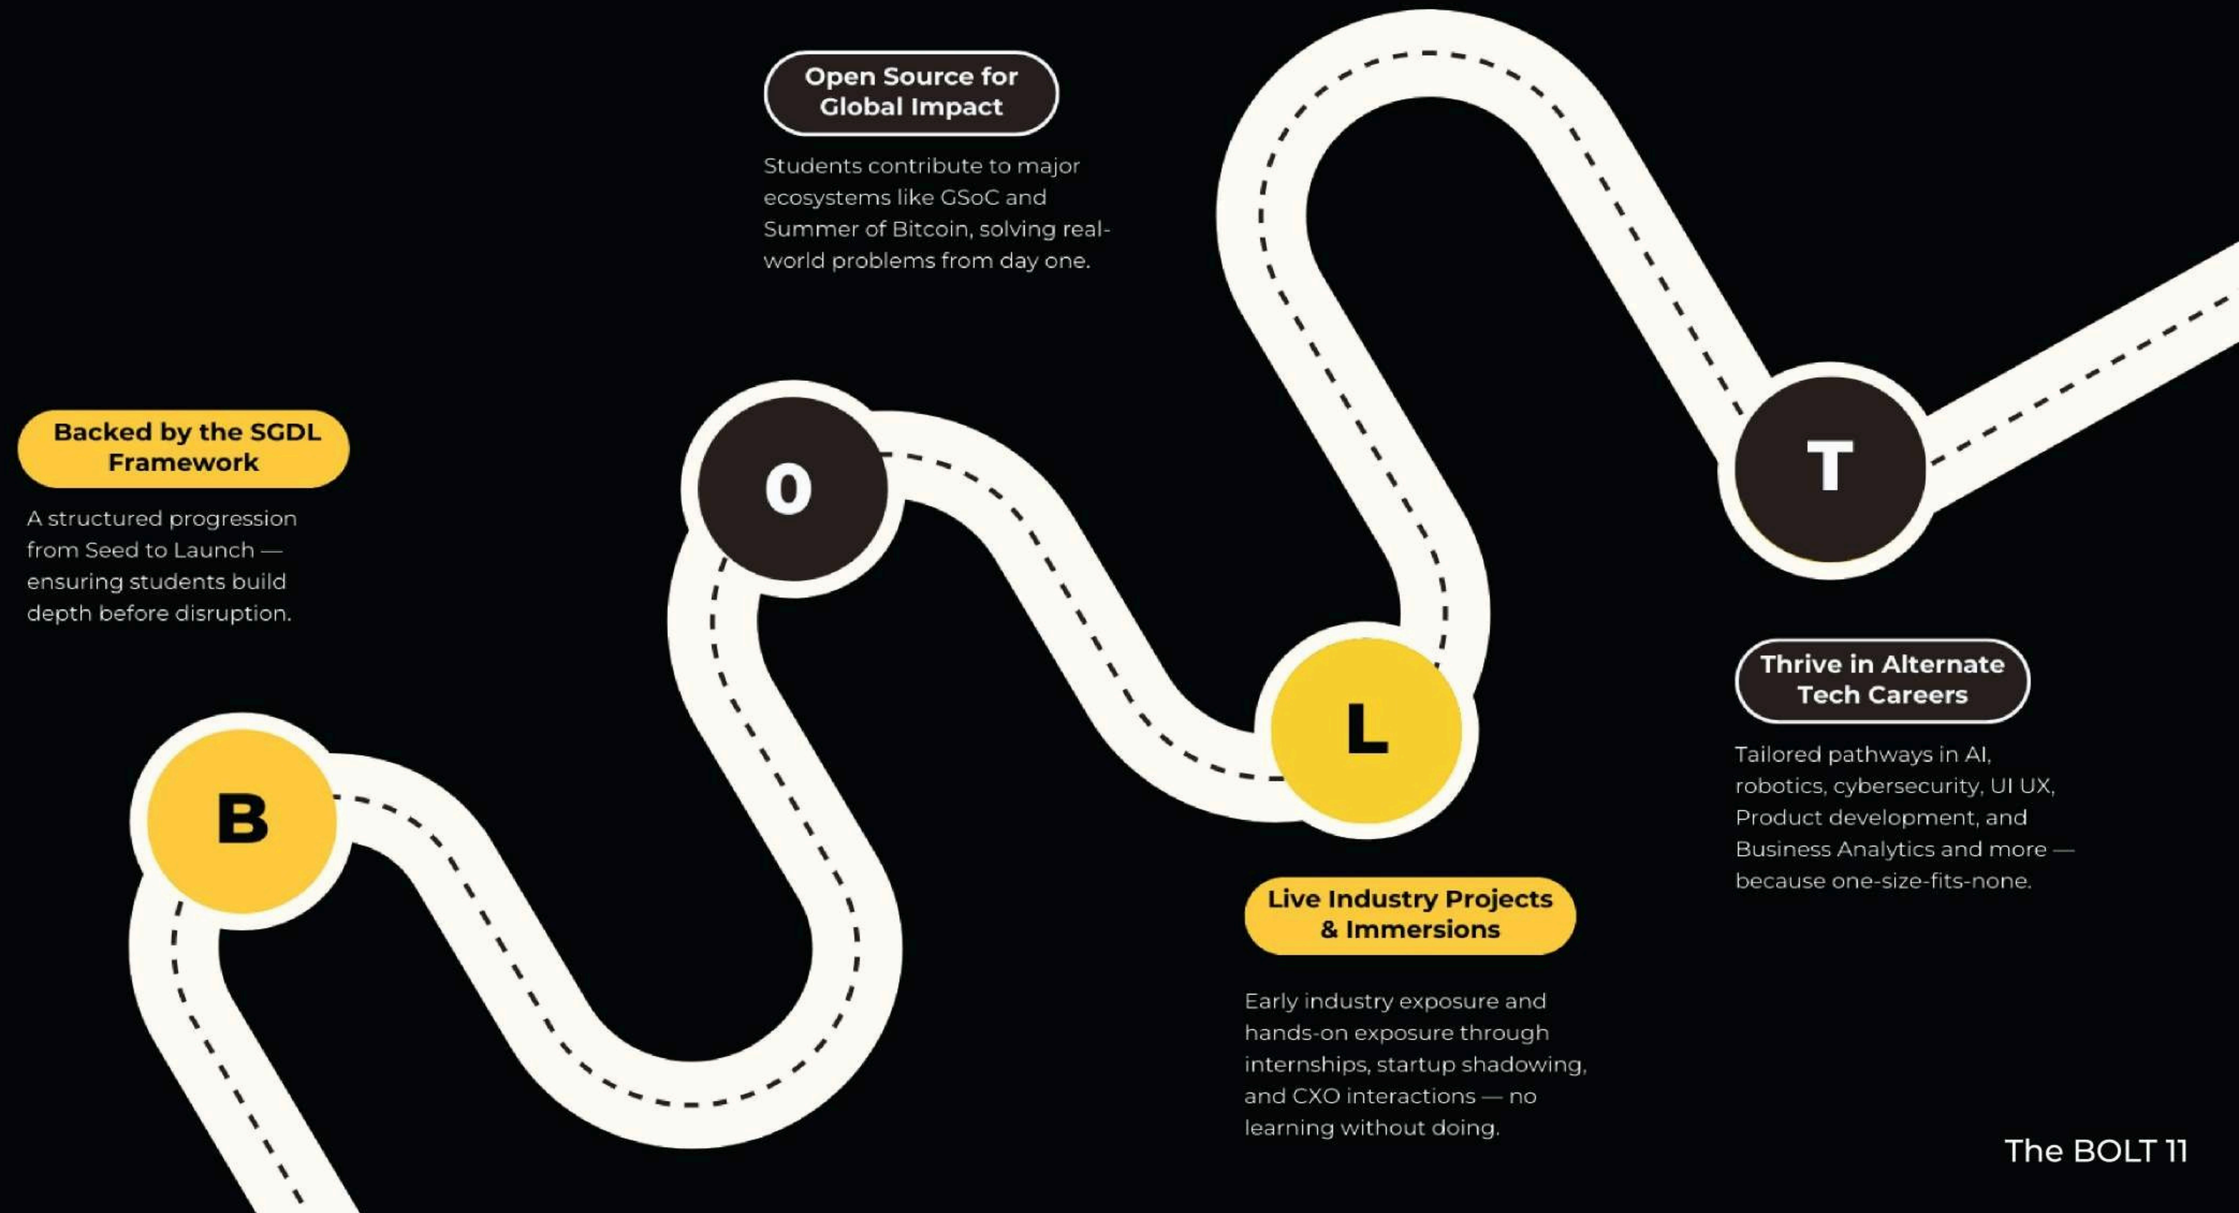
Don't navigate the twists and turns of internships and placements alone. Get matched with a Success Buddy.

Next gen of
techies

05 The BOLT

Built by Builders.
Designed for Disruption.

The University-approved curriculum blends real-world engineering with industry insight. Built by the tech team behind Classplus (a platform trusted by 7 crore+ users across India) and shaped by leaders from Google, Microsoft, and more, it's designed to meet real industry needs. At its core is the BOLT Model — our unique system to develop top 1% tech talent.



Backed by the SGDL Framework

A structured progression from Seed to Launch — ensuring students build depth before disruption.

Open Source for Global Impact

Students contribute to major ecosystems like GSoC and Summer of Bitcoin, solving real-world problems from day one.

Live Industry Projects & Immersions

Early industry exposure and hands-on exposure through internships, startup shadowing, and CXO interactions — no learning without doing.

Thrive in Alternate Tech Careers

Tailored pathways in AI, robotics, cybersecurity, UI UX, Product development, and Business Analytics and more — because one-size-fits-none.

Backed by
the SGDL Framework

Year 1, Seed
Learn your basics

Front End Web Development (HTML and CSS)
Computer Science/ FOCP (Javascript)
Problem Solving using Programming (Java & DSA)
Introduction to Back End Development
Front End Development
Programming for Problem Solving (Advanced DSA)

By the end of Year 1, you will:

- Build a Social Media Platform for Techies
- Build an automated Testing Suite
- Participate in National Level competitions
- Contribute to Open Source companies

Year 2, Grow
Build your AI/ ML Fundamentals

Advance Backend Engineering
Data Science and Analytics
Introduction to Machine Learning
AI Augmented Software Development
Introduction to Deep Learning
Artificial and Virtual Reality Development
Ethics and Responsible AI
Internship Experience (during Sem III & IV)

By the end of Year 2, you will:

- Build a Data Cleaning and Transformation Tool
- Build an Interactive Dashboard
- Build a Spam Classifier for Emails
- Work on VR Game Development
- Build your own AI fo rgenerating content on social media
- Prepare for DSA

Year 3, Disrupt
Become an AI/ ML Maestro

Application of AI/ML
Cloud Computing and DevOps
Neural Networks
Advanced DSA
Natural Language Processing
Generative AI
Internship Experience (during Sem V & VI)

By the end of Year 3, you will:

- Train AI to read and generate real images and videos
- Build a Stock Market Prediction AI
- Replace Doctors with AI and Data Analysis
- Deploy Applications on Cloud
- Set up Automatic Server updates for applications on the internet
- Prepare for Opportunities at Google, Meta and Apple- DSA , Design & AI

Year 4, Launch
Pick your Choice

Choose between building ChatGPT of your own, Programming a Drone, Building a Smart Home System utilizing IoT connectivity, sensor integration and basic app development, exploring fields like Quantum Computing, Reinforcement Learning And Autonomous Robotics in this year.

By the end of Year 4, you will:

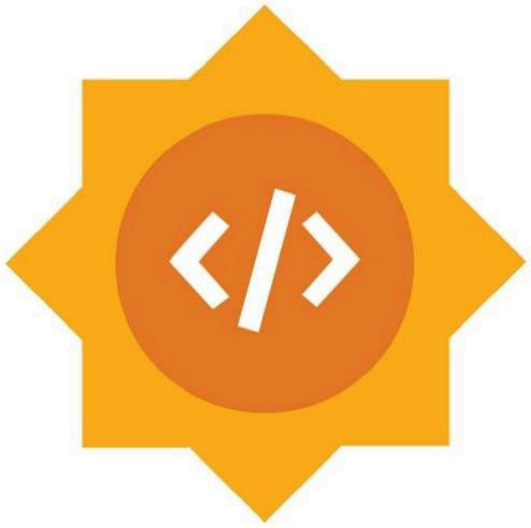
- Build AI-based real world Customer Support Chatbot
- Build a Search and Rescue Assistance Drone
- Build a comprehensive IoT-Enabled Home Automation System
- Build a Quantum-Enhanced Encryption System
- Build an autonomous Warehouse Bot
-

Curriculum Tracks
& Academic Credits

The 4-year curriculum supports 163 credit points (min.) for qualifying for the awarding of degree by MSU and can be broadly divided into two tracks, i.e.

Industry Track	University Track	Total Credits (for Degree)
88 Credits	75 Credits	163 Credits

Open Source for Global Impact



Google Summer of Code (GSoC)s

2024 - **3 students** got selected.

2025 - **11 students** got selected.

Google summer of code is one the prestigious open source peogram with just 5% selection rate worldwide

---

Linux Foundation (LFX)

2024 - **1 student** got selected.

2025 - **3 students** got selected .

One of the most renowned open source program worldwide

Summer of Bitcoin (SOB)

2025- **4 students** got selected.

With only **0.4% selection rate worldwide**, this is tougher than cracking JEE

Where PST Students **Have Contributed:**

TensorFlow.js

APACHE HTTP SERVER PROJECT

bitcoin

Google Summer of Code

mozilla Firefox

CODE 4 GovTech
Building Digital Public Goods

ecosystem support program

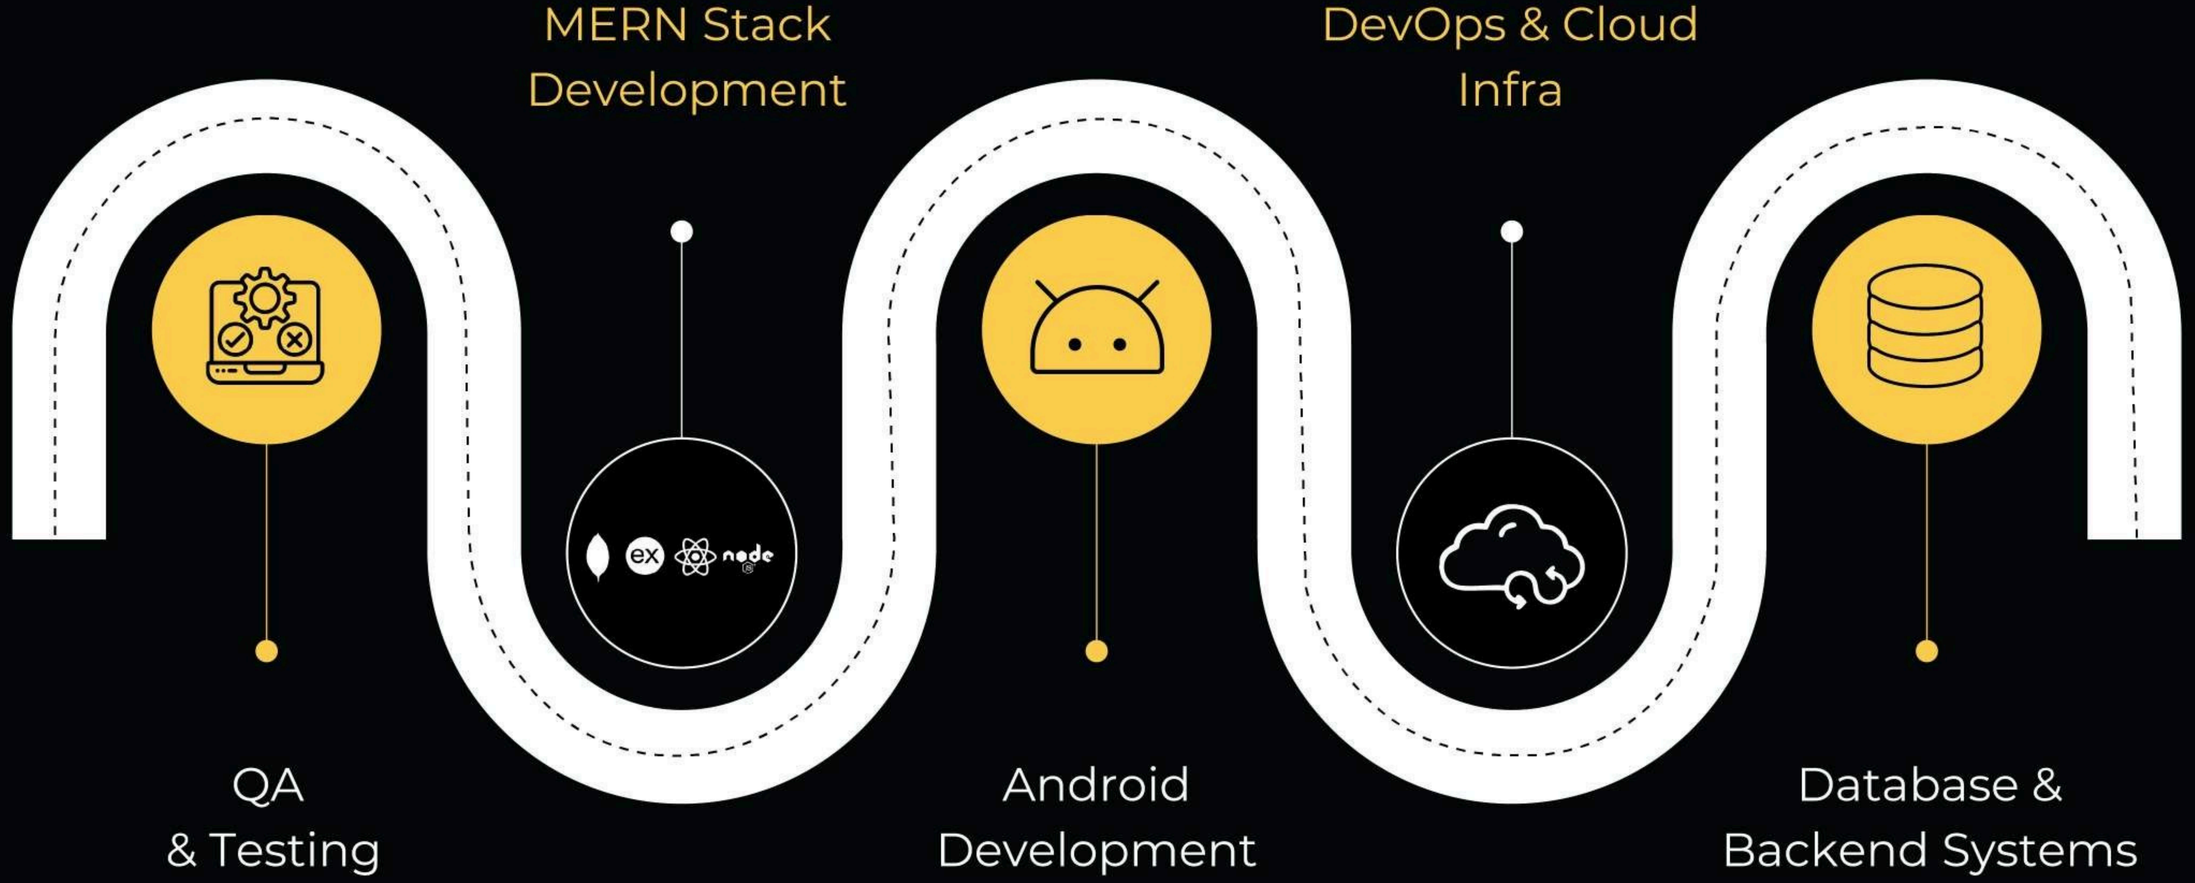
Why This Matters:

- Public open-source profiles = strong career signals
- Exposure to collaborative, global coding culture
- Real-world impact and credibility before graduation
- Portfolio > Resume — always

Live Industry Projects & Immersions

FAST
Fiercely Accelerated Software Talent

At PST, your application is carefully reviewed and assessed and decisions are not just made based on academic criteria. Individuals with a well-rounded personality and decent academic and co-curricular record are the blueprint of a perfect PSTian.



Tech **Hijacked**

Tech Hijacked is a one-of-a-kind experience for selected PST students to hijack the offices of India's top tech companies — and sometimes, even global ones.
You won't be reading about **Swiggy's tech stack** — you'll be sitting with the team that built it.

From data centers to design sprints, this program puts you in the rooms where real engineering happens.

Company Deep Dives: Visit top product and tech companies to see how real systems run at scale
Techie Hangouts: Interact with engineers, product teams, and tech leaders who build your favorite apps
Behind-the-Scenes Access: Learn how business goals meet engineering reality
Cross-Country Learning: Exposure to global tech culture and workflows
Inspiration to Build Bigger: Understand what it takes to go from a college project to a 100M+ user product

This isn't a tour. It's a tech takeover.

Thrive in Alternate Tech Careers

Thrive in **Alternate Tech Careers**

Not every tech mind wants to code forever — and that's okay.

At PST, we recognize that **tech is a spectrum.** That's why we give students the freedom to explore high-impact roles beyond pure software — from **Product Development** and **UI/UX Design** to **Business Analysis** and beyond.
Because PST is more than a tech school — it's a **playground for experimentation**, where you're encouraged to explore, pivot, and find the path that fuels your passion.

Paramjeet Singh

AI in Edtech

Harsh Srivastav

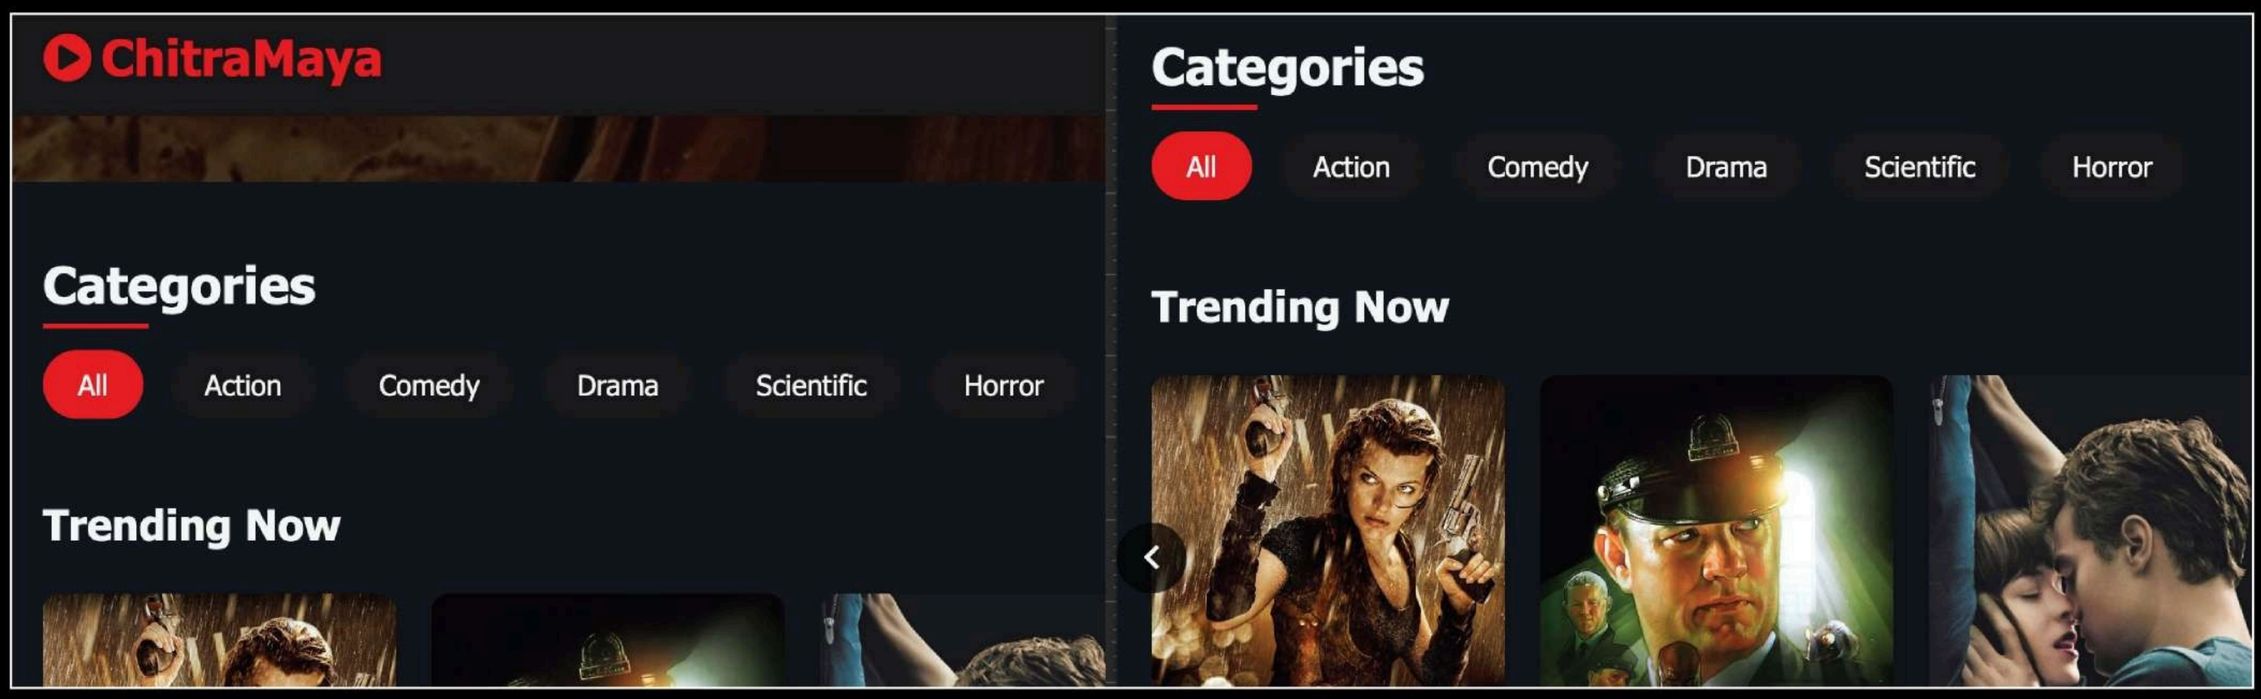
Product Design Head

06 Students wins

ChitraMaya
Spotify for Movies

Founded by Priyanshu Pandey, Tanishq Bhonsle, Aditya Pratap Singh, Rishab Kalburgi, and Jai

This AI-powered movie recommendation engine uses NLP and Machine Learning to curate hyper-personalized picks based on your taste, ratings, and search history. You can also build playlists, explore reviews, and share them with friends — all in one slick experience.

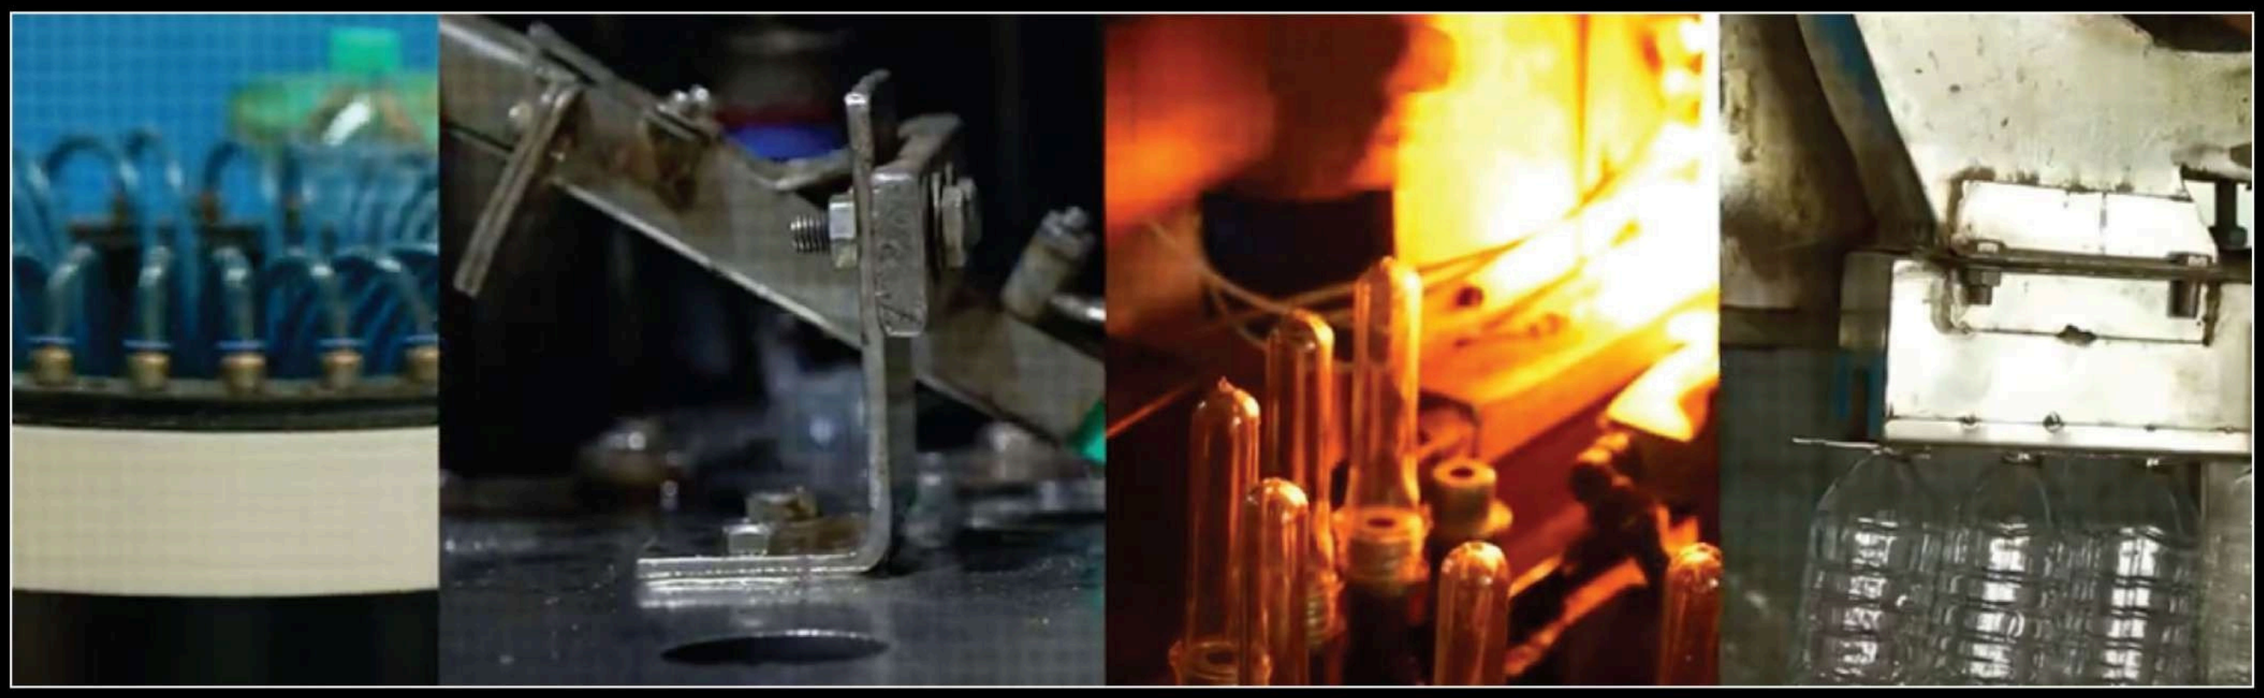


FREE TOYAM

Ad Revenue from Water Bottles

Vikas Chaudhary, Founder Free Toyam

This 18 year old PST student is making lakhs by selling free water.
A startup that turns water bottles into ad space for brands seeking real-world visibility. By distributing branded bottles for free at gyms, colleges, and hospitals, he's creating a smarter, more personal way for companies to connect with people offline.

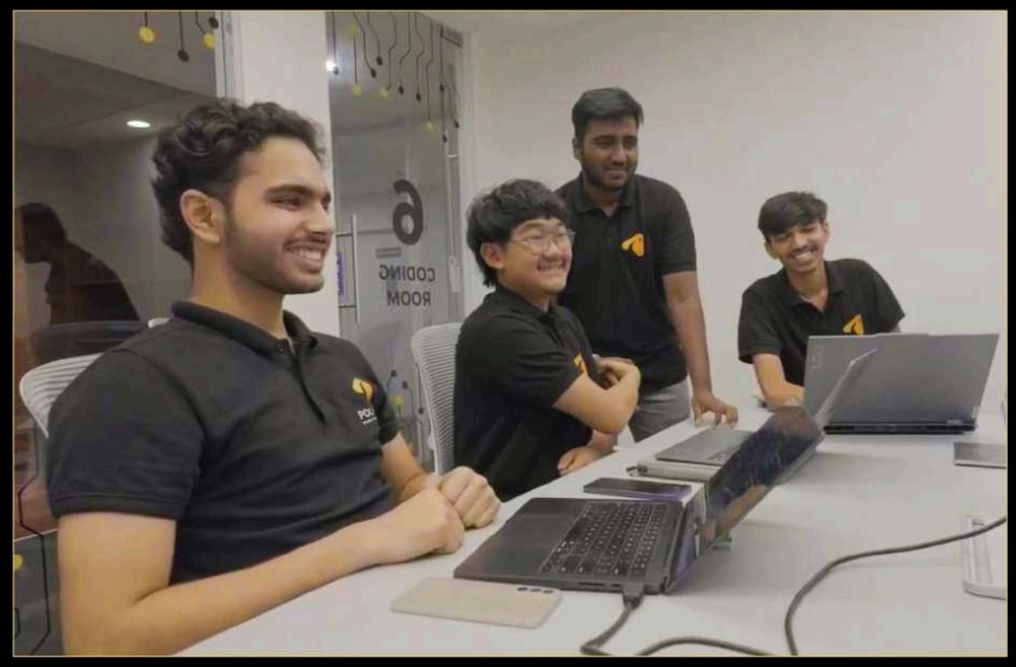


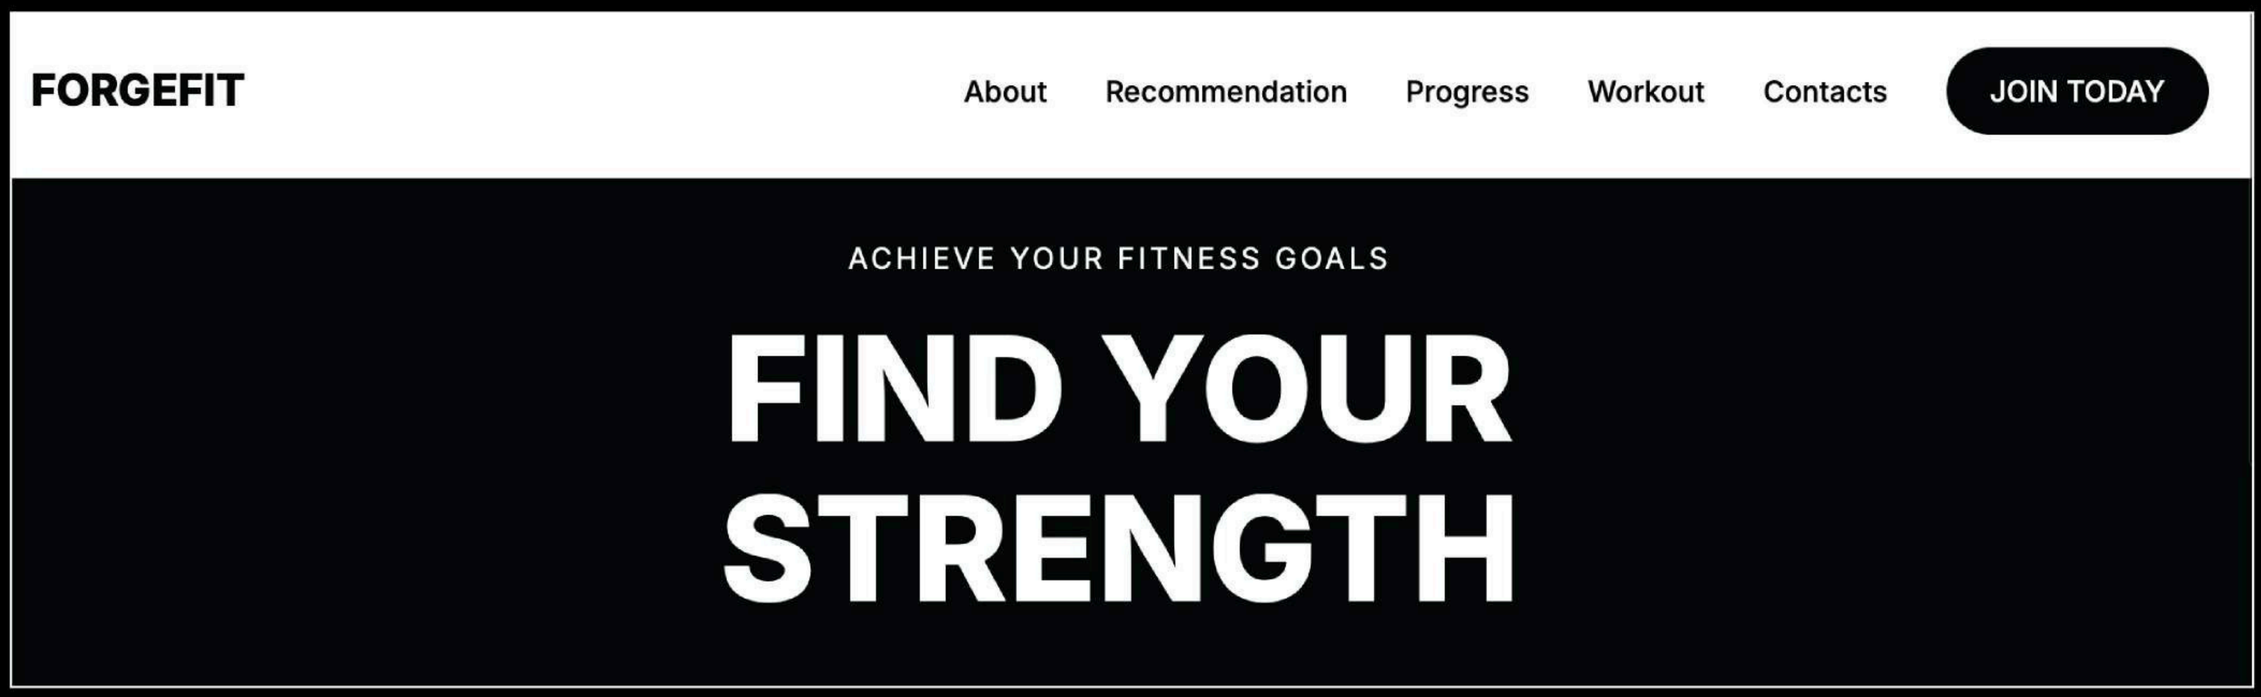
FORGEFIT

Not Your Average Fitness App.

Founded by Vishvendra Sangwa, Gopi kishan, Kharuhang Rai, Syed Abdur Rahaman

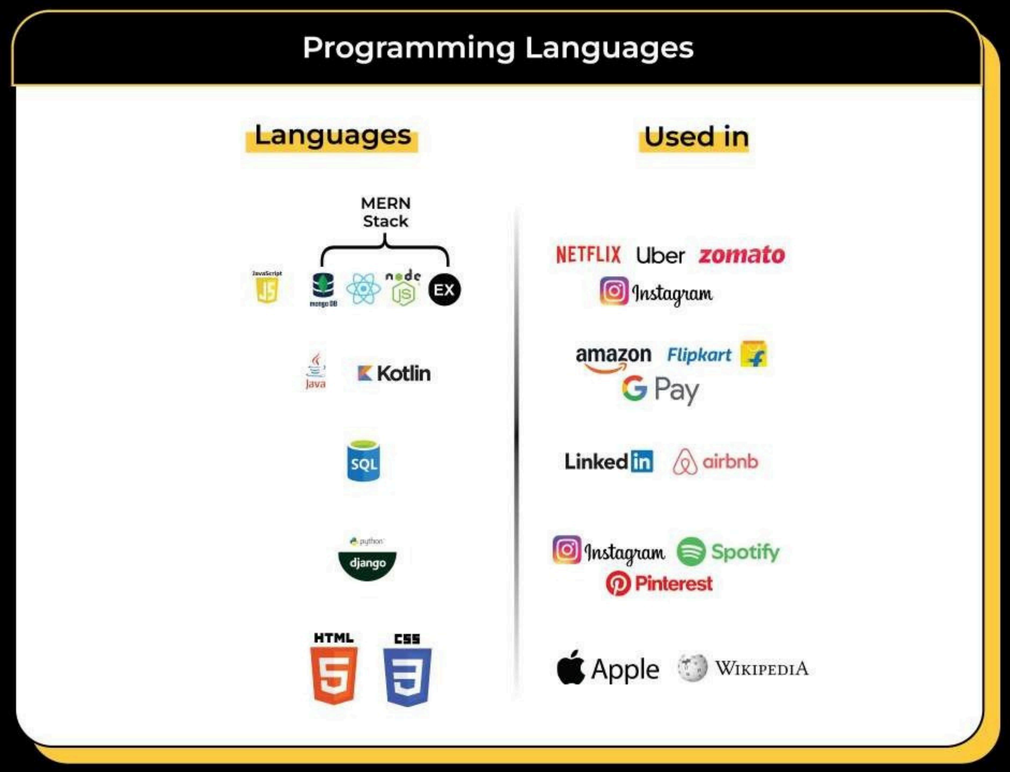
ForgeFit is a next-gen fitness app built by PST students — gym lovers and tech rebels — tired of rigid, cookie-cutter routines. Unlike typical apps, ForgeFit puts you in full control with flexible, personalized workout schedules you can adapt anytime.





How Students Code
Their Futures in Class

In just the first year at Polaris, students are introduced to over 10 industry-relevant programming languages — not just through lectures, but through hands-on projects, peer reviews, and live coding immersions.



What's more impressive is their problem-solving grit. On average, each student tackles and solves 300+ LeetCode questions within 7 months, building the kind of coding depth and logical thinking that top tech companies expect. These results reflect not just a strong curriculum, but the academic foundations and curiosity they bring from schools like yours.

Google Summer of Code

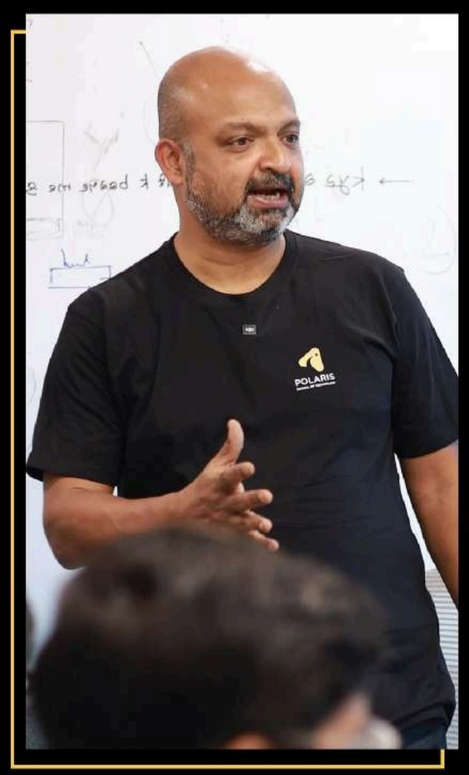
TechCombinator 2025



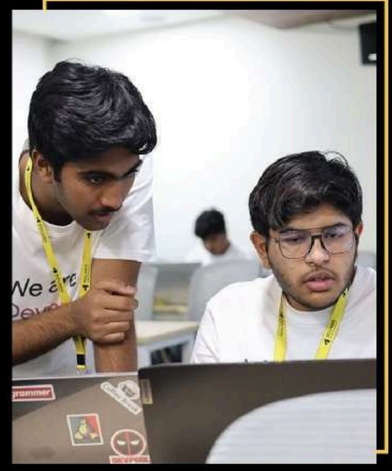
backing
188+
legendary
startups

Blume Ventures

TechCombinator is PST's flagship startup incubation program — where student founders pitch for USD $10,000 in seed funding and get insider exposure to the venture capital world. Our debut edition was launched by Mr. Sajith Pai, Partner at Blume Ventures — one of India's most respected early-stage VC firms, known for backing 188+ legendary startups like Slice and GreyOrange

PST
Buildathon

Google
for Developers



Build.
Break.
Innovate.

Buildathon
2025

Polaris Buildathon our flagship all-nighter hackathon in collaboration with Google for Developers.

This edition was focused on using tech solutions for women's safety & security.
20 hours, 60 students, 20 teams, 6 mentors from Google & PST

Fireside Chats

To be the best, you got to be with the best!

With that motto in mind, Polaris ensures students get up-close and **interact with industry experts and CXOs in PST's exclusive** Fireside Chats.

Creatorpreneur Bootcamp

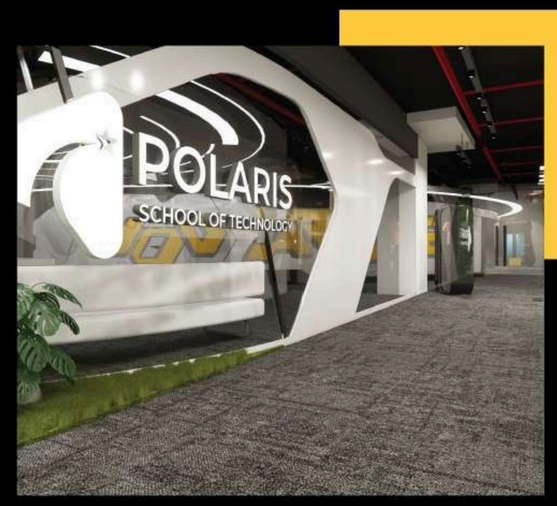
Learn storytelling, audience building, and digital influence from Ayush Wadhwa — Founder of Owled Media and creator with 300K+ followers. At PST, we don't follow trends — we learn from those who set them.

Tech Mixer

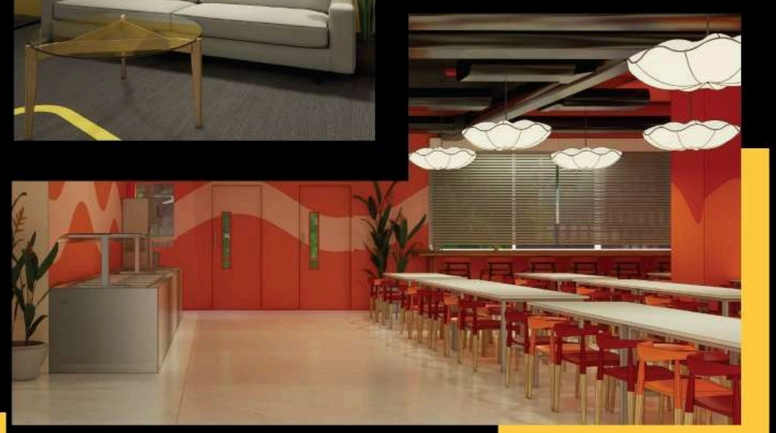
Learn, upskill & experience the campus, among the greats. Polaris allows you to attend Mixers & other events held by tech giants like **Microsoft**

08 Next-Gen PST Campus

Our
new Campus



POLARIS
SCHOOL OF TECHNOLOGY



Code your Future

PST's got Latent

A student-run talent show where performers and judges shared the stage. Pure talent, zero filters.

Sports Day

The **PST Fresher Party** offers a platform to **showcase your talents** and get to know your peers more closely.

Engineers Day

A day dedicated to our future innovators — with good vibes, great energy, and surprise hampers for our amazing students!

Orientation

A warm and **fun welcome to the PST freshmen**, where we don't just break the ice but, also connect with future peers and possibly future co-founders!

Incanto'25

The **PST Fresher Party** offers a platform to **showcase your talents** and get to know your peers more closely.

Diwali Celebration

In a space where people come from different cultures of India, festival celebrations are plenty and a great way to build camaraderie.

Constellation

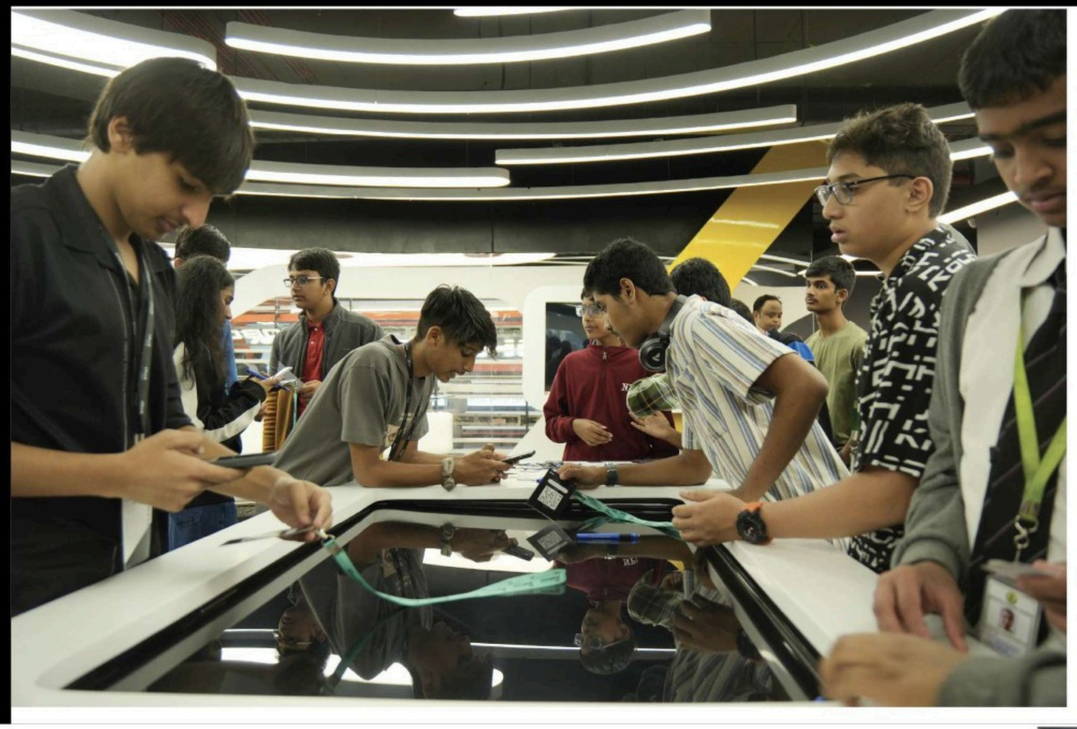
In tech, nothing significant is built in isolation. Constellation is a fun-filled tech fest that brings students and experts under one roof to collaborate, discover, and grow.

Vibeathon

3 days. 1500+ attendees. 3000+ sleepy eyes. 1 broken record. Vibeathon is recognized by the **Asia Book of Records** for achieving the 'Maximum Number of Participants in an Offline Tech Hackathon

MLH x Google Gemini

This is where India's next-gen builders code, create, and ship real projects that make noise with Gemini.



Emergent

This hackathon flips the script—150 builders, two days, zero-code tools, and nonstop coffee. Build that idea you've been sitting on, supported by **Emergent, OpenAI, Sarvam AI, and Agnost** AI, and demo it to an epic panel of judges.

Bangalore AI Hack Day

Build with AI, no coding required. Whether you're a creator, designer, founder, or enthusiast, this hackathon is your **chance to turn ideas into real apps**—powered by creativity, not code.

Synthax

Synthax is a space where students **explore, code, and build together**. It's a collaborative tech playground for all skill levels — from total beginners to curious creators.

09 PST vs Traditional Engineering Colleges

Feature	PST	Other Colleges
Model	Industry-led	Academia-led
Results	Proven results, 8x better than IITs	Yet to prove results, mostly claims
Internships	Work integrated and semester-wise internship-based curriculum with 5 - 6 internships	Up to 2 internships only
Campus	Corporate campus; surrounded by companies in Bengaluru	Traditional campus set-up

4-Year Computer Science Program in AI & ML - Advantage		
Salary Potential	Significantly higher average annual CTC (240% globally)	Lower average annual CTC
Company Preference	Product Companies	Service Companies
Higher Education	Preferred by top universities (MIT, Stanford) for MS & PhD	May be accepted, but B.Tech preferred
Long-Term Advantage	Clear advantage for senior software roles at top tech companies	May face restrictions for senior roles

910 Internships & Placements

1000+ Hiring Partners
& Counting

From global tech titans to AI disruptors, our placement ecosystem is built for the bold. PST students have landed internship opportunities with marquee internship programs and companies like

INDmoney FITTR Simpl NUTANIX

wishlink mindpeers Credgenics loop

JioCinema amazon Adobe hunch

YAMAHA blinkit DELHIVERY meesho

zomato CARS24 gupshup testbook

Leena AI Jar ATHER gojek

International Pathways:

Opportunities to unlock top-tier internships or higher education abroad, PST opens global doors.

1

Personalized Career Support:

Your journey, your roadmap — powered by our expert mentor and success team. From building a standout portfolio, outreach strategy and prepping for MAANG-level interviews— we’re with you at every step.

2

Classplus
Alumni network

- **120+ PST curriculum makers** are already making waves at top tech companies across the globe.
- **15+** of them have founded their own startups.

Experience the same powerful pedagogy that accelerated these careers. Their secret formula becomes yours.

011 Admissions & Fees

Eligibility **Criteria**

At PST, we are committed to developing top-notch tech professionals in the country. The University-approved program is designed to cater to only the best-in-class. The minimum requirements are:

- Applicants must have completed their 12th (PCM) from a recognized Board in 2023/ 2024/ 2025 with a minimum of 60%.
- Applicants pursuing their 11th (PCM) from a recognized Board are eligible to apply to the Polaris Early Entry Program (PEEP).
- Applicants must have completed their 10th from a recognized Board with a minimum of 60%.
- Applicants must have secured a minimum cutoff in each section of the PAT.
- Applicants must clear the interview.

Admission **Process**

1. **Sign up on the PST Website**
   Complete the online application and ensure you meet eligibility requirements. Submit necessary documents.

2. **Take the Polaris Admission Test (PAT)**
   The Polaris Admission Test (PAT) is offered in two formats—Aptitude or Coding—allowing students to choose the path that suits them best.

3. **1:1 Interview**
   Meet our admissions team for a one-on-one interview to discuss your background and program interest.

4. **Pre-Engineering Sessions**
   After securing your seat, you're eligible for our Pre-Engineering Session — a glimpse of PST's pedagogy and learning experience.

5. **MSU Admission Process**
   Follow enrollment instructions in your admission letter and submit required documents and fees.

6. **Admission Letter**
   Receive an admission letter upon successful completion of all steps.

7. **Enrollment**
   Follow enrollment instructions in your admission letter and submit required documents and fees.

Fee **Structure**

Details	Semester							
	Sem 1	Sem 2	Sem 3	Sem 4	Sem 5	Sem 6	Sem 7	Sem 8
Registration Fee	₹ 10,000	–	–	–	–	–	–	–
Admission Fee	₹ 81,000	–	–	–	–	–	–	–
Tuition Fee	₹ 4,25,000	₹ 4,25,000	₹ 3,52,000	₹ 3,52,000	₹ 2,93,000	₹ 2,93,000	₹ 2,34,500	₹ 2,34,500

Note: This is the updated tuition fee for Class of 2026-2030. This is exclusive of Hostel & Mess.

Scholarships **and Waivers**

Sourav Ganguly Scholarship for Extracurriculars:

By cricket legend Sourav Ganguly, this scholarship recognizes outstanding achievement in sports, while supporting academic pursuits.

1

Classplus Techpreneur scholarship:

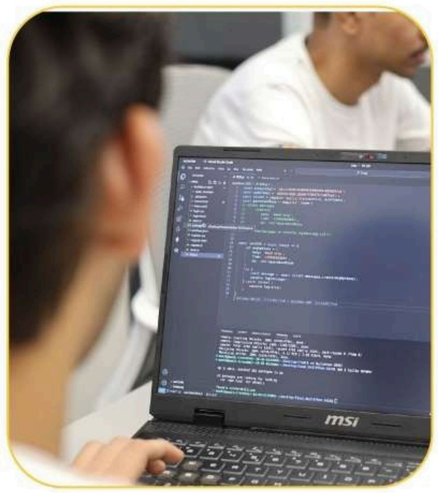
This scholarship by Classplus, the innovators behind PST, supports your dream of becoming a tech entrepreneur.

2

PST Diversity Scholarship:

PST celebrates inclusivity. This scholarship empowers talented students from diverse backgrounds, fostering a vibrant learning environment for all.

3



PST Need-cum-Merit waiver:

This scholarship goes beyond grades. The PST Need-cum-Merit Waiver considers both academic achievement and financial need, making PST education more accessible..

4

PST Merit waiver

Rewarding academic excellence, the PST Merit Waiver provides financial aid to deserving students with a strong academic track record.

5

How
to apply?

At the time of admission submit an essay and proof of income for self and family (in case of need based scholarships

Disclaimer:

- All applicants are considered for merit based scholarships by default.
- Each applicant will be eligible to receive only one of the tuition waivers.
- The school reserves the right to add, withdraw or modify any of the criteria, amount and count for all the tuition waivers/scholarships cited above.
