STELLAR INSTITUTE OF TECHNOLOGY

India's #1

Four Year B.TECH IN

Computer Science

Program (WITH AI & ML)

SIT is the Industry Skilling Partner of Medhavi Skills University, a UGC recognized Skills University.

stellarcampus.com

About Stellar

Integrated B. Tech in Computer Science with AI ML
Stellar Institute of Technology serves as an Industry Skilling Partner of Medhavi Skills University, a UGC-recognized Skills University offering an Integrated B.Tech program in Computer Science (AI & ML), Stellar Campus delivers industry-aligned engineering education focused on real-world skills.
Students learn through hands-on projects, internships, and mentorship from industry professionals.
A strong entrepreneurship ecosystem enables students to validate ideas, build startups, and learn directly from founders and CTOs.
With a focus on emerging technologies and innovation, Stellar Campus prepares learners to be both job-ready and venture-ready.

Vision

" To build a global ecosystem where every student can learn, build and launch with real world mentorship and practical execution. "

Mission

"To make every student future ready through skill driven learning, expert mentorship, and start up incubation all under one ecosystem. "

CEO Words

Mr. Jagdish Patil

CEO, Stellar

At Stellar Institution of Technology, we're not just teaching tech we're building an ecosystem for techies.
A space where skills meet real projects, ideas turn into startups, and learners grow into creators.

Our focus is simple: learn by building, grow by solving, and lead through innovation. If you're ready to create impact, not just earn a degree Stellar is your place.

The Reality of Engineering Careers: What Students Must Know

‘Sharp dip’: Tech hiring slowdown hits campuses, placements fall across major institutes

New Delhi: A sudden and sharp slump in campus hiring has left students across top engineering institutes staring at uncertainty, with placement numbers dipping noticeably compared to previous years. According to insights gathered from multiple career cells and placement committees, an unexpected 3–12% decline in successful placements has been recorded across 18 major institutes during the 2023-24 academic cycle.

In Short

- Hiring across tech firms dropped due to global slowdown
- Committees report fewer high-value offers than last year
- Institutes advised to increase

Industry observers point to a mix of shrinking tech budgets, AI-led restructuring, and cautious recruitment as the key reasons. While some institutes have maintained steady numbers, several reported fewer recruiters, reduced CTC

News

IITs’ placement rate dropped from 90% to 80% from 2021 to 2024

Placement rates for BTech graduates in nearly all 23 IITs have dropped between 2022 and 2024, including the highest-ranking IIT Madras, Bombay, Delhi, Kanpur and Kharagpur.

VIRAL

Here's why 38% of IIT graduates are unemployed

The changing job market, influenced by global conflicts, automation, and outdated curricula, is affecting IIT graduates' job placements and salaries, pushing for skill upgrades and entrepreneurial thinking.

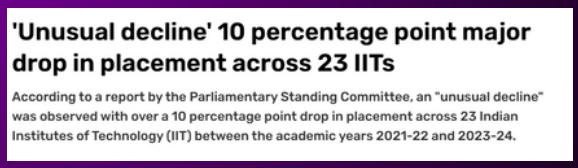
THIS STORY IS FROM OCTOBER 28, 2024

Pursuing engineering once a fad, now a dilemma: Only 10 percent of 15 lakh graduates likely to land jobs this year

Deepto Banerjee / TOI Education / Updated: Oct 29, 2024, 12:03 IST

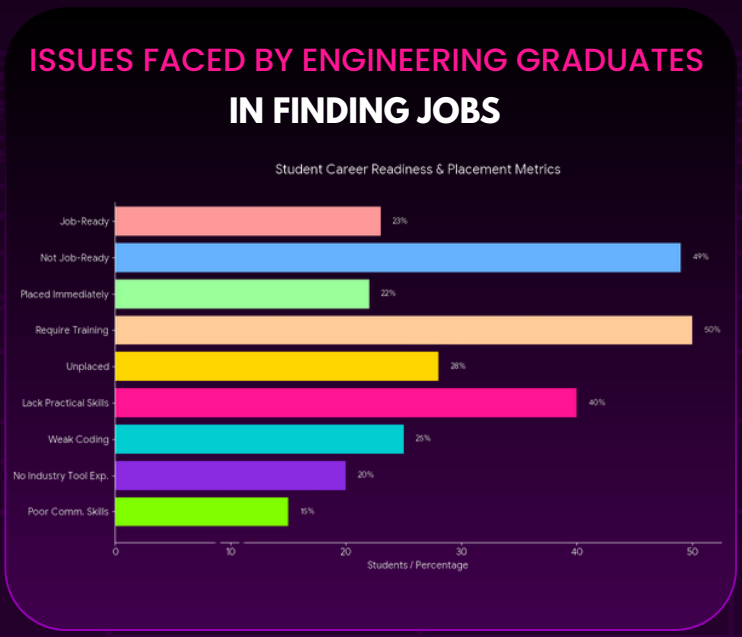


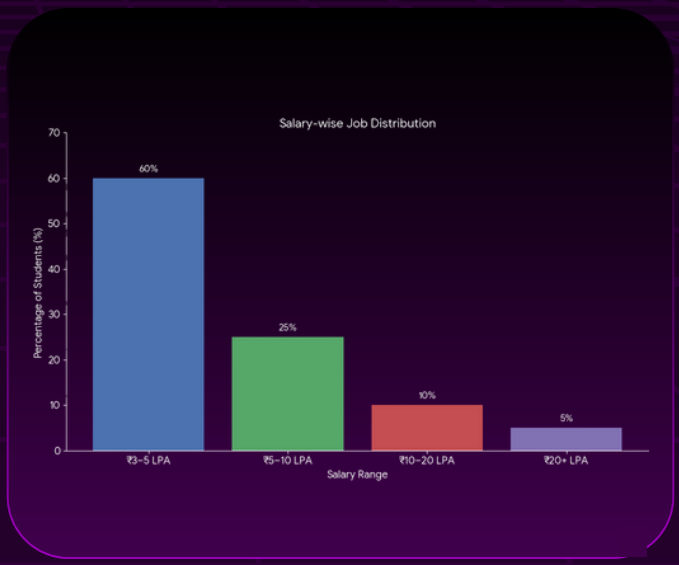
'Unusual decline' 10 percentage point major drop in placement across 23 IITs

According to a report by the Parliamentary Standing Committee, an "unusual decline" was observed with over a 10 percentage point drop in placement across 23 Indian Institutes of Technology (IIT) between the academic years 2021-22 and 2023-24.

More than **15 Lakh students dream of engineering careers in India** every year. They grinding for the exam, hoping for a coveted seat in an IIT or NIT.

The Engineering Employability Gap





Why Stellar

At Stellar, we bridge the gap between outdated academic curriculum and industry requirements. We prepare students not only to learn fundamentals, but also to apply knowledge daily through hands on labs, projects, and corporate mentorship. By graduation, every student leaves with a degree, a portfolio of real world work, and the confidence to lead in the tech industry.

Traditional Colleges vs Stellar

Aspect	Traditional Colleges	Stellar
Curriculum	Theory-heavy, outdated syllabus	Industry-driven, updated with latest tech
Learning Style	Lectures & rote learning	Daily labs, projects, case studies
Projects	1-2 mini projects in 3-4 years	Real-world projects every semester
Industry Exposure	Internships optional, limited	Corporate mentors, internships built-in
Graduation Outcome	Degree only, job prep left to student	Degree + portfolio + job-ready skills
Placements	Limited Support	100 % guarantee placement support
Classroom Infrastructure	Basic classrooms	Smart classrooms & Apple labs
Personal Laptop	Not included	Apple MacBook

Industry Aligned Curriculum

Courses are co-created with leading corporate partners to ensure the curriculum matches real industry needs.
Industry experts contribute insights on current tools, technologies, and skills used in the workplace.
This approach helps students gain job-relevant knowledge and practical exposure, improving employability.

Hands-on experience with top companies begins in the first year.

47 Lakh
Highest Package secured.

₹ 2.4 Lakh
Average stipend in the first year

89%
Students cracked some of the world's toughest open-source programs.

50+
Companies conducted internship talks in the first year.

Entrepreneurship Guidance

Students receive structured, step-by-step mentorship directly from experienced startup founders and 25+ CTOs.
This guidance begins as early as the 2nd year, helping students build clarity beyond academics.
Mentors support learners in skill development, real-world problem solving, and career direction.
Early exposure ensures students grow with industry-ready thinking and leadership skills.

Open Source Coding for Global Impact

Google Summer of Code (GSoC)s

2024 - 3 students got selected.
2025 - 11 students got selected.
Google Summer of Code is one the prestigious open-source program with just 5% selection rate worldwide

Linux Foundation (LFX)

2024 - 1 students got selected.
2025 - 3 students got selected.
One of the most renowned open source program worldwide

Summer of Bitcoin (SOB)

2025 - 4 students got selected.
With only 0.4 % selection rate worldwide, this is tougher than cracking JEE

Students Value Add-Ons

MacBook

Use it for coding, designing, projects & internships from 1st semester.

Worth ₹60,000

AI Tools

Get premium access to AI tools for coding, content, automation & research from 2nd Semester.

Worth ₹50,000

Dubai Industry Trip

Meet industry leaders, visit companies & explore global opportunities from 3rd semester.

International Trip

Campus Scenario

The Sports Scene at SIT

From energetic badminton rallies to intense cricket face-offs and spirited house tournaments — the sports culture at SIT keeps the campus alive and competitive.

The Cultural Nights at SIT

Open-mics, battle of bands, dance wars and fashion showcases — nights at SIT are filled with lights, laughter, rhythm and unforgettable moments.

The Modern Classrooms at SIT

AI-powered smart boards, high-speed connectivity and interactive teaching environments —
SIT classrooms redefine the future of learning.

The Café & Food at SIT

Fresh brews, quick bites and multi-cuisine options — the SIT Café is where friendships grow and ideas spark over a cup of coffee.

Curriculum Overview

Year 1: Foundation & Core Programming

Key Skills You'll Build

C / C ++ | Programming Fundamentals | Basic Data Structures | Discrete Math | HTML & CSS | Git / GitHub

Semester 1: Programming Fundamentals

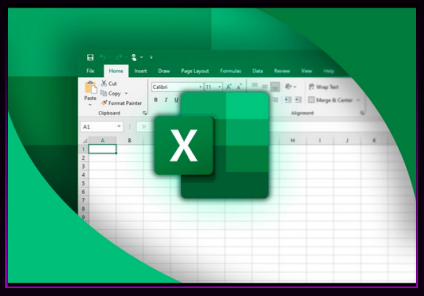
- Functional English & Communication Skills
- Introduction to Programming (C/C++)
- Data Structures Basics
- Mathematics for Computer Science I
- Web Fundamentals
- Lab: Programming Fundamentals

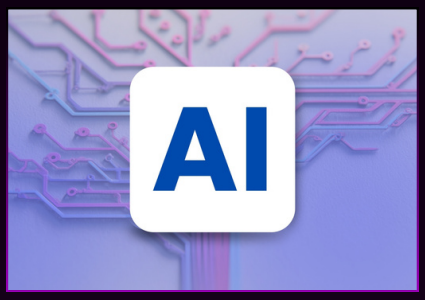
Semester 2: Data Structures & Algorithms

- Advanced Data Structures
- Algorithm Design & Analysis
- Mathematics for Computer Science II
- Database Fundamentals
- Introduction to Web Development (Frontend)
- Lab: Data Structures & Algorithms

Curriculum Overview

Year 2: Backend Development & Advanced Algorithms





Key Skills You'll Build

Operating Systems | Node.js / Python Backend | SQL & NoSQL | Cloud Fundamentals | DevOps (CI/CD, Docker, Kubernetes basics) | System Design Basics

Semester 3: Backend Development & Databases

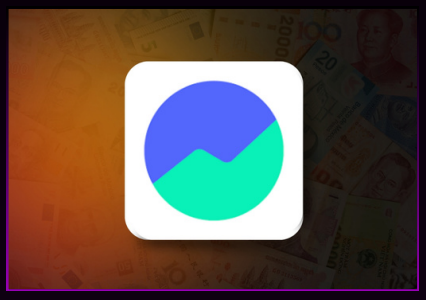
- Operating Systems Fundamentals
- Backend Web Development (Node.js / Python)
- Advanced Database Systems
- System Design Basics
- Cloud Computing Fundamentals
- Lab: Backend Development

Semester 4: Full-Stack Development & DevOps

- Advanced Web Development (Full-Stack)
- DevOps & Deployment
- Software Engineering Principles
- Computer Networks
- Project Management & Agile
- Lab: Full-Stack Projects

Curriculum Overview

Year 3: Specialization – AI/ML & Advanced Topics



Key Skills You'll Build

Machine Learning | Deep Learning | Data Science | Computer Vision | NLP | Distributed Systems | MLOps

Semester 5: Artificial Intelligence & Machine Learning

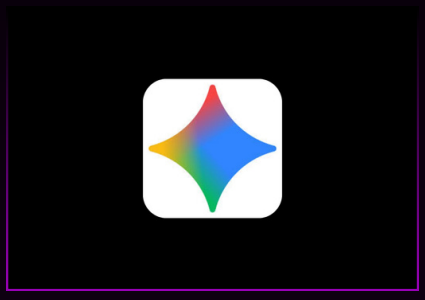
- Introduction to AI & ML
- Data Science Fundamentals
- Machine Learning with Python
- Deep Learning Basics
- Advanced System Design
- Lab: AI / ML Projects

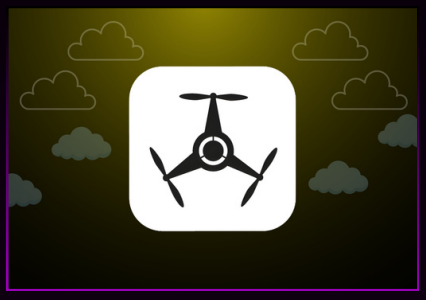
Semester 6: Advanced AI/ML & Specialization

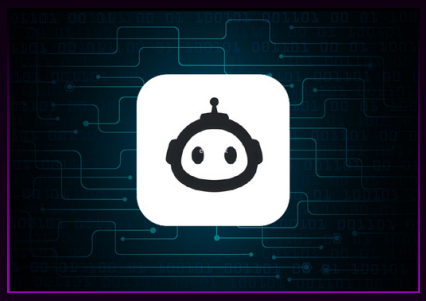
- Advanced Machine Learning
- Deep Learning Advanced
- Computer Vision
- Natural Language Processing
- MLOps & Production ML
- Lab: Advanced ML / AI Projects

Curriculum Overview

Year 4: Specialization Tracks & Industry Projects







Key Skills You'll Build

- AI / ML Engineering
- Full-Stack & Cloud
- Data Engineering
- Product & Design
- Capstone Projects
- Entrepreneurship

Semester 7: Specialized Tracks (Choose One)

- AI/ML Engineering
- Full-Stack & Cloud Engineering
- Data Engineering
- Product & Design

Semester 8: Capstone Project & Launch

- Industry-Led Capstone Project
- Open Source Contributions
- Internship & Industry Immersion
- Entrepreneurship & Launch (Optional)
- Advanced Research Topics (Optional)

Degrees and Certifications

Graduates will receive a 4 year Integrated B.Tech Computer Science (AI & ML) by **Medhavi Skills University**, a UGC recognised institution.

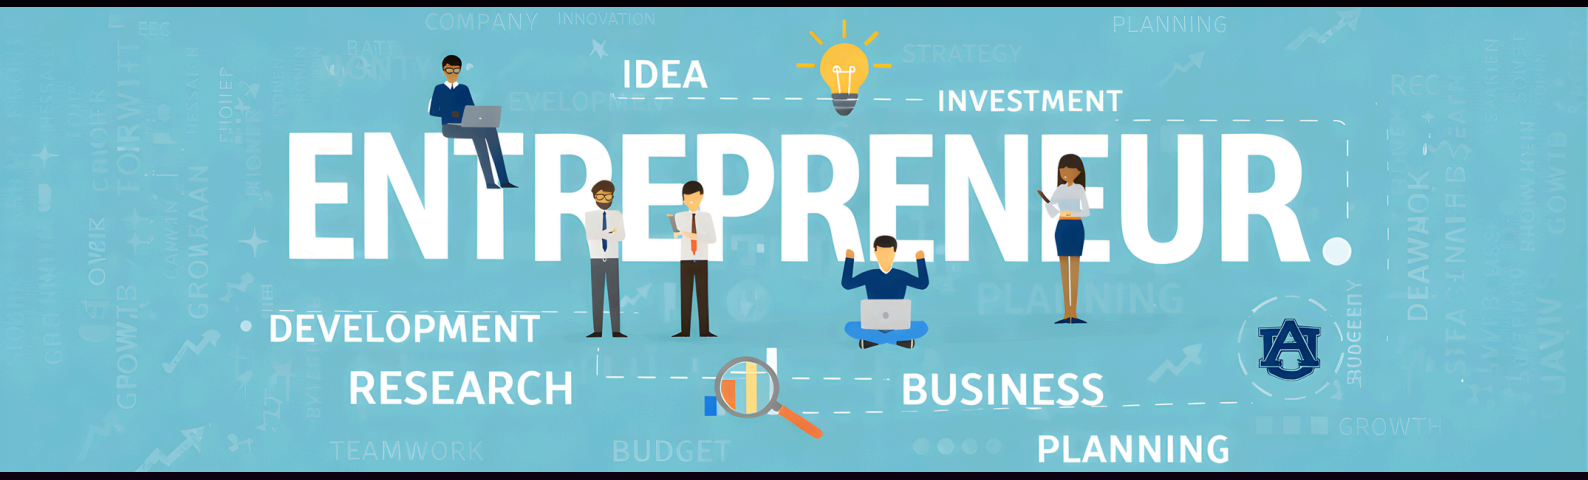
Stellar Effect

10 Students got Google Summer of Code Internship

Google Summer of Code (GSoC) gives students global exposure to real-world open-source development with expert mentorship. Selected participants earn a Google certificate, stipend, strong resume value, and access to a global developer network.

GSoC Ratio : In 2025, 44,000 proposals were submitted, and only 967 were accepted, resulting in an acceptance rate of just 2.197%.

Become an Entrepreneur



B.Tech program where you don't just study engineering— you build companies, products, and a founder-level career.

1 **Tech Entrepreneurship from 2nd Semester**

Start building your own product from Semester 2 with guided innovation labs, startup challenges, and MVP development.

2 **Mentorship from 25+ CTOs & Founders**

Learn directly from top CTOs, startup leaders, and industry experts through masterclasses, tech reviews, and founder roundtables.

3 **One-on-One Career & Startup Mentorship**

Dedicated tech mentor + startup mentor for personalised guidance, portfolio review, and your complete founder roadmap.

4 **Build Real Tech Products During B.Tech**

AI/ML, Full Stack, Cloud, Cybersecurity, App Development — build 3+ real products and launch at least one live startup.

5 **End-to-End Startup Ecosystem**

Innovation labs, incubation support, investor networking, demo days, hackathons, and pitch sessions integrated into the program.

6 **Graduate as a Leader**

Become a top-tier engineer, product builder, or startup founder — with skills, product, network, and investors ready.

"From the end of the 3rd year, funding of up to $10,000 will be provided."

stellarcampus.com

Industry Mentor

Mr.Neelanjoy Saha

- Completed B.Tech in Electrical Engineering from **National Institute of Technology Durgapur (2008–2012)**
- Holds an MBA in Operations Management from **Indian Institute of Management Mumbai (NITIE) (2016–2018)**

- **Served as a Founder Member of MSMERISE,** a forum under the Centre for Global Competitiveness of MSMEs at NITIE, contributing towards entrepreneurship and MSME-focused initiatives.
- Demonstrated **leadership** during graduation as Project Head (Project Revival) at Aarohan, the techno-management fest of NIT Durgapur.
- Worked as Event Coordinator at **Prakriti**, the environmental club of NIT Durgapur, strengthening abilities in team coordination, event management, and structured execution.

Bombay's Founder Club

Bombay Founders' Club (BFC) is an invite only community of startup founders built to foster meaningful connections, peer learning, and long term growth. It provides a trusted space where entrepreneurs share real experiences, challenges, and insights beyond traditional networking. Through curated interactions and founder led initiatives, BFC empowers founders to build stronger companies together.

Our official partnership with BFC – Bombay Founders Club unlocks early access to real startup ecosystems for every learner. From Semester 1st, students receive entrepreneurship focused training, expert mentorship, and continuous guidance. They gain exclusive opportunities to connect with founders, CTOs, and industry leaders building networks that open doors to funding and long-term success. With the right support system in place, learners are equipped to launch their own startups as early as the 2nd or 3rd semester.

Founder, Chief Technology Officer (CTO)
Independent Tech Leader & Advisor

Startup Support

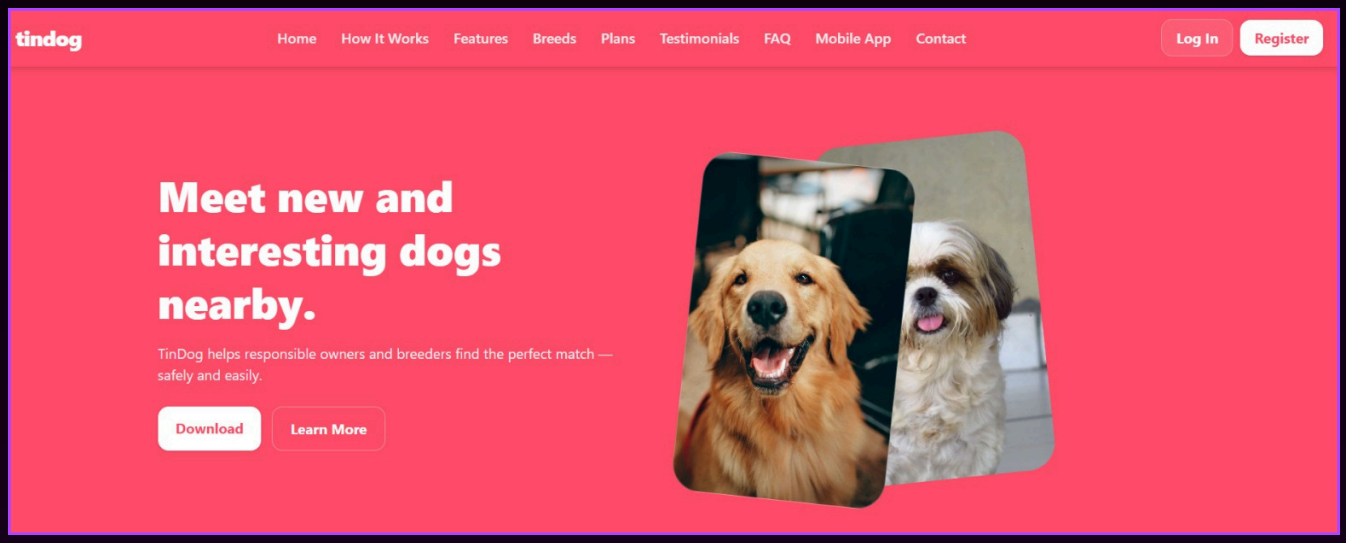
Startup Support Through Government Initiatives

- **Startup India Initiative** – DPIIT recognition, tax benefits, easier compliance, mentorship & incubation support.
- **Startup India Seed Fund Scheme (SISFS)** – Seed funding for idea, prototype, and early-stage startups via incubators.
- **Atal Innovation Mission (AIM)** – Promotes innovation through Atal Tinkering Labs (students) and Atal Incubation Centres (startups).
- **NIDHI (DST Program)** – Funding and mentorship for student innovators and tech-based startups (e.g., NIDHI-PRAYAS).
- **Pradhan Mantri Mudra Yojana (PMMY)** – Collateral-free loans for small/student-led businesses.
- **MSME Incubation Schemes** – Infrastructure, mentoring, and financial support through government-supported incubators.
- **Shark tank India** – We offers complete startup support to help students prepare for pitching on Shark Tank India. Students receive mentorship for idea validation, pitch decks, valuation, and mock pitches to confidently face investors.

Projects Built by Our Stellar Students

TinDog
Dhamini Ninave

TinDog – Tinder for Dogs is a social matchmaking app designed for dogs and their owners. It allows users to discover nearby dogs, set up playdates, exchange tips, and build a community of pet lovers—all through a simple swipe-and-match interface.



KRUSHIMITRA
Sinojiya Manthan

KrushiMitra is a secure contract-farming marketplace that connects farmers and buyers through verified contracts, real-time price data, GPS-based local matching, seamless payments, smart inventory tools, in-app communication, and integrated logistics—ensuring transparent, reliable, and efficient agri-trade.
