A Call To the **Next Generation**

Don't Just Get a Degree. ***Be a part of the next tech revolution.***

A next-gen, **4-year Engineering Program** from leading universities.
Meticulousy designed for students who want to pioneer the future of AI, Quantum and GenAI.

The future of technology belongs to those who create, not just follow. At upGrad School of Technology, we partner with leading universities to offer an in-campus engineering program that blends academic depth with real-world innovation. Here, you don't just earn a degree: you build the skills, mindset, and confidence to become a tech leader, researcher, or entrepreneur, shaping what's next.

Built by Legends.
Mentored by Pioneers.

Our vision combines deep industry experience, strong academic grounding, and a shared commitment to building future-ready education.

RONNIE SCREWVALA
Co-founder, upGrad

Visionary entrepreneur who built transformative enterprises in education and media

VISHWA MOHAN
CEO, upGrad School of Technology

Recognized among India's Top 40 CIOs (2023)
Former CIO: PhysicsWallah, LinkedIn, Amazon, PayPal

MEHUL KHANDHEDIA
Chief - Revenue & Outcomes

Ex-Professor Mumbai University
Ex- Coursera & PhysicsWallah
Curated 35,000+ career transitions

Best of **Both Worlds**

Where World-Class University Meets
Silicon Valley-Style Tech Learning

University Advantage

- State-of-the-Art Campus
- Vibrant University Life
- Engineering Program
- Interdisciplinary Curriculum
- Fully Residential Campus

BEST OF BOTH WORLDS

Silicon Valley Style Learning

- Sessions by MAANG Engineers
- Coding from Day 1
- AI-First Campus
- CXO Masterclasses
- Tech with Management

One Degree, Three Pathways

Whether it's a MAANG job, your own startup, or a global PhD — we've built the track for you.

01

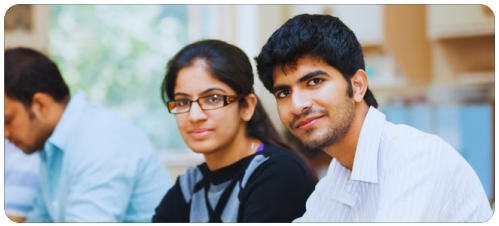
High-Paying Job Pathway

Build industry-relevant skills from Day 1 through hands-on coding, hackathons, projects, and global competitions. Learn to build disruptive tech valued by startups and MAANG firms, backed by strong internship and placement opportunities.

02

Startup Support Program

A 7-semester startup mastery track offering mentorship, incubation, and expert guidance with no-limit funding support for promising ventures, empowering you to launch and scale your startup while earning your degree.



03

Research & Higher Studies Advantage

Master research, publishing, and academic writing skills while preparing for GRE, TOEFL, IELTS, SOPs, and scholarships — your pathway to top global universities and research careers.

Outcome Driven **Curriculum**

Bachelor of Engineering in
Full Stack AI Cloud Innovation

SEMESTER 01

- Engineering Mathematics I (Calculus, Linear Algebra)
- Programming Foundations (Python)
- Computer Organization & Architecture
- Frontend Development Basics (HTML, CSS, JavaScript)
- Communication Skills (Written and Verbal)
- Digital Electronics
- Universal Human Values

SEMESTER 02

- Engineering Mathematics II (Discrete Mathematics, Probability)
- Programming Foundations (Java)
- Data Structures & Algorithms I (Basic Concepts, Arrays, Linked Lists)
- Operating Systems Fundamentals
- Industrial Economics
- Version Control Systems (Git, GitHub)
- Backend Development Fundamentals (ReactJs,Node.js, Express)
- Personality and Professional Development

SEMESTER 03

- Engineering Mathematics III (Statistics & Numerical Methods)
- Data Structures & Algorithms II (Trees, Graphs, Sorting & Searching)
- Database Management Systems (SQL, Relational Models)
- AI & ML Fundamentals, Data Preprocessing, Classical ML algorithms
- Data Visualization Tools (Excel, Google Sheets, Power BI Basics)
- Cybersecurity Fundamentals Integrated Lab (Basic concepts, safe practices)
- Aptitude-1

SEMESTER 04

- Computer Networks & Security Principles
- Software Engineering & Software Project Management
- DSA & System Design Advanced
- Cloud Computing Concepts & Services (AWS, Azure)
- Deep Learning
- Advanced SQL & NoSQL Databases
- Professional Ethics in Technology

SEMESTER 05

- Data Engineering Fundamentals
- Business Intelligence & Analytics
- Generative AI Fundamentals (Transformers, Large Language Models (LLMs), Diffusion Models)
- Elective-1 (Microprocessor & Interfacing, Quantum Computing , Soft Computing, Modelling & Simulation, BioInformatics, Cloud Computing)
- Applied Linear Algebra & Optimization for AI
- Professional Networking & Career Development

SEMESTER 06

- Advanced Generative AI Applications & Prompt Engineering
- MLOps & AI Pipeline Engineering
- Big Data Technologies & Distributed Systems (Hadoop, Kafka , Spark) -MOOcs
- AI-Powered Data Analytics & Insights
- Elective-2 (Choose from: Ethical Hacking, Blockchain, AR/VR, DevOps, Computer Vision , IOT)
- Leadership, Communication & Innovation Integrated Lab

SEMESTER 07

- Agentic Systems and AI Pipelines (Core Agent Development)
- Advanced MLOps & AI System Operations
- Capstone Project Phase I (Ideation, Proposal, Prototype Development)
- Internship I (4–6 months, Industry or Startup)
- AI Productivity Tools and Frameworks (Notion, ChatGPT, GitHub Copilot)
- Advanced Tech Masterclasses (Security, Blockchain, Web3, Product Innovation)

SEMESTER 08

- Advanced Generative AI Applications & Prompt Engineering
- MLOps & AI Pipeline Engineering
- Big Data Technologies & Distributed Systems (Hadoop, Kafka , Spark) -MOOcs
- AI-Powered Data Analytics & Insights
- Elective-2 (Choose from: Ethical Hacking, Blockchain, AR/VR, DevOps, Computer Vision , IOT)
- Leadership, Communication & Innovation Integrated Lab

TechXplore:
Advanced Skills Workshop Series

- Ethical Hacking & Cybersecurity
- Advanced Android Development
- Internet of Things (IoT) & Edge Computing
- Blockchain & Decentralized Apps (DApps)
- Augmented Reality (AR) & Virtual Reality (VR) Development
- Game Development Fundamentals
- Java & Spring Framework Mastery
- Advanced Full Stack Development
- Mobile App Development
- Cloud Certifications Bootcamp (AWS / Azure / GCP)
- Data Science with Python
- Python Programming
- MLOps & AI Deployment Essentials
- Quantum Computing Basics with Qiskit

Bachelor of Engineering in
AI and Gen AI Engineering

SEMESTER 01

- Engineering Mathematics I (Calculus, Linear Algebra)
- Programming Foundations (Python)
- Computer Organization & Architecture
- Frontend Development Basics (HTML, CSS, JavaScript)
- Communication Skills (Written and Verbal)
- Digital Electronics
- Universal Human Values

SEMESTER 02

- Engineering Mathematics II (Discrete Mathematics, Probability)
- Programming Foundations (Java)
- Data Structures & Algorithms I (Basic Concepts, Arrays, Linked Lists)
- Operating Systems Fundamentals
- Industrial Economics
- Version Control Systems (Git, GitHub)
- Backend Development Fundamentals (ReactJs,Node.js, Express)
- Personality and Professional Development

SEMESTER 03

- Engineering Mathematics III (Statistics & Numerical Methods)
- Data Structures & Algorithms II (Trees, Graphs, Sorting & Searching)
- Database Management Systems (SQL, Relational Models)
- AI & ML Fundamentals, Data Preprocessing, Classical ML algorithms
- Data Visualization Tools (Excel, Google Sheets, Power BI Basics)
- Cybersecurity Fundamentals Integrated Lab (Basic concepts, safe practices)
- Aptitude-1

SEMESTER 04

- Computer Networks & Security Principles
- Software Engineering & Software Project Management
- DSA & System Design Advanced
- Cloud Computing Concepts & Services (AWS, Azure)
- Deep Learning
- Advanced SQL & NoSQL Databases
- Professional Ethics in Technology

SEMESTER 05

- Python for Data Analytics & Automation
- Business Intelligence & Analytics (Power BI, Tableau, Advanced Excel)
- Generative AI & LLMs, applied projects (chatbots, image generation, etc.).
- “Professional Networking & Career Development“
- Elective-1 (Microprocessor & Interfacing, Quantum Computing , Soft Computing, Modelling & Simulation, BioInformatics)
- English Proficiency and Aptitude Building

SEMESTER 06

- AI-Powered Business Analytics & Decision Science
- DataOps & MLOps Basics (CI/CD for ML, MLflow, Airflow, Kubernetes)
- Real-World Product Development & Agile Project Management
- Elective-2 (Choose from: Ethical Hacking, Blockchain, AR/VR, DevOps, Computer Vision , IOT)
- Mathematics Elective (MOOCS course)
- Leadership, Communication & Innovation Integrated Lab

SEMESTER 07

- Agentic Systems and AI Pipelines (Core Agent Development)
- Advanced MLOps & AI System Operations
- Capstone Project Phase I (Ideation, Proposal, Prototype Development)
- Internship I (4–6 months, Industry or Startup)
- AI Productivity Tools and Frameworks (Notion, ChatGPT, GitHub Copilot)
- Advanced Tech Masterclasses (Security, Blockchain, Web3, Product Innovation)

SEMESTER 08

- Capstone Project Phase II (Final Product Development & Launch)
- Internship II (Final Placement, Remote/Freelance Project)
- Startup Incubation & Entrepreneurship Support
- Placement Booster Sessions (Advanced DS & Algo, System Design, HR Prep)
- Graduation Showcase & Career Fair

TechXplore: **Advanced Skills Workshop Series**

- Ethical Hacking & Cybersecurity
- Advanced Android Development
- Internet of Things (IoT) & Edge Computing
- Blockchain & Decentralized Apps (DApps)
- Augmented Reality (AR) & Virtual Reality (VR) Development
- Game Development Fundamentals
- Java & Spring Framework Mastery
- Advanced Full Stack Development
- Mobile App Security & Optimization
- Cloud Certifications Bootcamp (AWS / Azure / GCP)
- Data Science with Python
- MLOps & AI Deployment Essentials
- Quantum Computing Basics with Qiskit

Bachelor of Engineering in **AI and Quantum Computing**

SEMESTER 01

- Engineering Mathematics I (Calculus, Linear Algebra)
- Programming Foundations (Python)
- Computer Organization & Architecture
- Frontend Development Basics (HTML, CSS, JavaScript)
- Communication Skills (Written and Verbal)
- Digital Electronics
- Universal Human Values

SEMESTER 02

- Engineering Mathematics II (Discrete Mathematics, Probability)
- Programming Foundations (Java)
- Data Structures & Algorithms I (Basic Concepts, Arrays, Linked Lists)
- Operating Systems Fundamentals
- Industrial Economics
- Version Control Systems (Git, GitHub)
- Backend Development Fundamentals (ReactJs,Node.js, Express)
- Personality and Professional Development

SEMESTER 03

- Engineering Mathematics III (Statistics & Numerical Methods)
- Data Structures & Algorithms II (Trees, Graphs, Sorting & Searching)
- Database Management Systems (SQL, Relational Models)
- AI & ML Fundamentals, Data Preprocessing, Classical ML algorithms
- Data Visualization Tools (Excel, Google Sheets, Power BI Basics)
- Introduction to Classical Computing (Quantum Context)
- Aptitude-1

SEMESTER 04

- Computer Networks & Security Principles
- Software Engineering & Software Project Management
- DSA & System Design Advanced
- Cloud Computing Concepts & Services (AWS, Azure)
- Mathematical Postulates of Quantum Mechanics
- Elements of Quantum Computing (Qubits, Gates, Circuits)
- Professional Ethics in Technology

SEMESTER 05

- Deep Learning
- Data Engineering Fundamentals
- Quantum Programming (Qiskit, OpenQASM, IBM Quantum)
- Linear Algebra & Quantum Gates
- Elective-1 (Microprocessor & Interfacing, Quantum Computing , Soft Computing, Modelling & Simulation, BioInformatics, Cloud Computing)
- Professional Networking & Career Development

SEMESTER 06

- Generative AI
- MLOps & AI Pipeline Engineering
- Quantum Programming Frameworks (PennyLane, QC-Lab)
- Quantum Machine Learning (Hybrid Models, Variational Circuits)
- Elective-2 (Choose from: Ethical Hacking, Blockchain, AR/VR, DevOps, Computer Vision , IOT)
- Leadership, Communication & Innovation Integrated Lab

SEMESTER 07

- Quantum Protocols & Algorithms (Grover, Shor, QFT)
- Quantum Labs I & || (Hands-on IBM/PennyLane)
- Capstone Project Phase I (Ideation, Proposal, Prototype Development)
- Internship I (4–6 months, Industry or Startup)
- AI Productivity Tools and Frameworks (Notion, ChatGPT, GitHub Copilot)
- Advanced Tech Masterclasses (Security, Blockchain, Web3, Product Innovation)

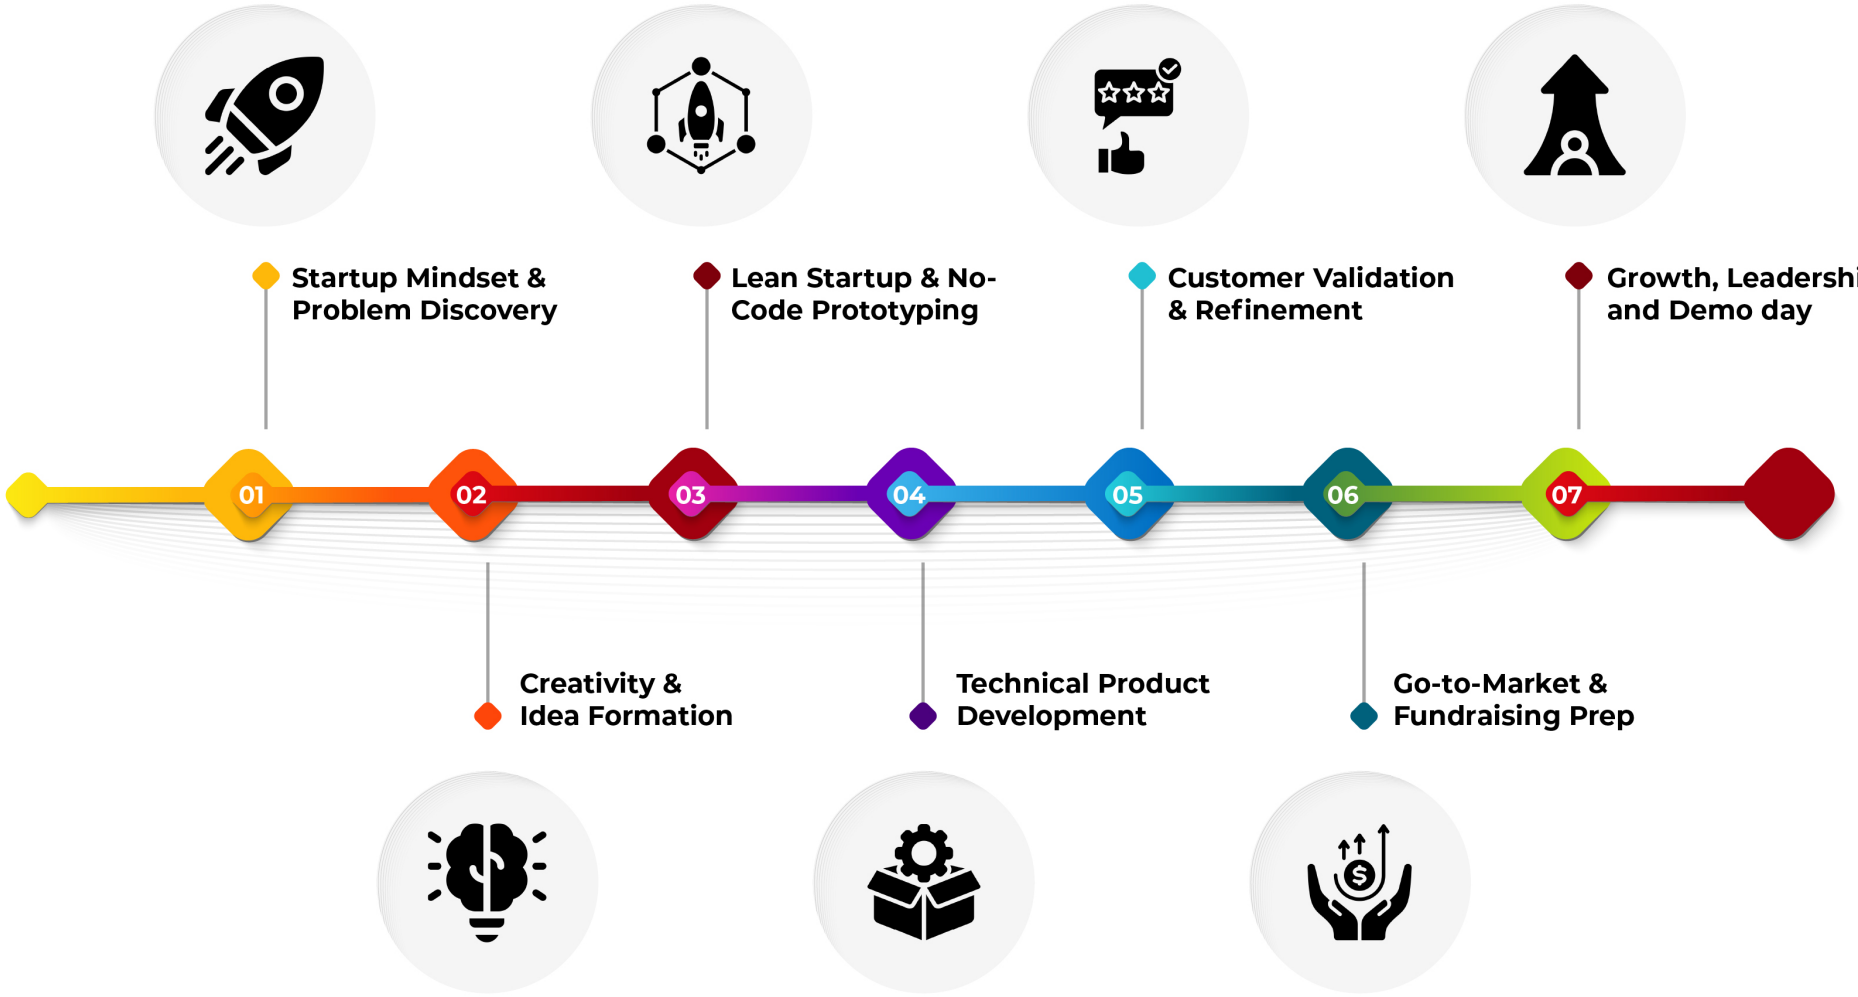
SEMESTER 08

- Capstone Project Phase II (Final Product Development & Launch)
- Internship II (Final Placement, Remote/Freelance Project)
- Startup Incubation & Entrepreneurship Support
- Placement Booster Sessions (Advanced DS & Algo, System Design, HR Prep)
- Graduation Showcase & Career Fair

TechXplore:
Advanced Skills Workshop Series

- Ethical Hacking & Cybersecurity
- Advanced Android Development
- Internet of Things (IoT) & Edge Computing
- Blockchain & Decentralized Apps (DApps)
- Augmented Reality (AR) & Virtual Reality (VR) Development
- Game Development Fundamentals
- Java & Spring Framework Mastery
- Advanced Full Stack Development
- Mobile App Security & Optimization
- Cloud Certifications Bootcamp (AWS / Azure / GCP)
- Data Science with Python
- MLOps & AI Deployment Essentials
- Quantum Computing Basics with Qiskit

7-Semester **Startup Journey**



7-Semester **Research Journey**

The **uGSOT** Experience: More Than a College

Live and Breathe **INNOVATION.**

A vibrant residential campus designed for collaboration and creativity.

Structured support for **GLOBAL HACKATHONS**

Training, mentoring, and support beyond the classroom

icpc.foundation

icpc

Google Summer of Code

NASA INTERNATIONAL SPACE APPS CHALLENGE

We Don't Just Teach. **We Build.**

Our pedagogy is engineered around one core principle: Learn-by-Building. From day one, you will be immersed in a dynamic environment that mirrors the real world of tech innovation, ensuring you graduate not just with a degree, but with a portfolio of deployable applications, paid work experience, and the confidence to create impact.

The Four Pillars of Your **Transformation:**

01 AI-Driven, Personalized Learning

Your educational journey is as unique as you are. Our proprietary AI platform creates a personalized learning path for each student, adapting to your pace and style.

- AI-Powered Classes & LMS: Intelligent classrooms that turn complex theory into hands-on coding projects.
- Skills Mapping & Individual Mentorship: One-on-one guidance to help you specialize and excel in your chosen track.
- Adaptive Pathways: Choose and accelerate in CS, AI, or ML based on your interests.

02 CodeMiles

We believe expertise is forged through practice. The CodeMiles framework ensures you build muscle memory for complex problem-solving.

- 4,000+ Hours of Coding Practice
- 300+ Real-World Projects & Hackathons
- 15+ Fully Deployable Applications by graduation
- Build for the Real World: Tackle live problem statements directly from unicorns and top startups, ensuring your work has immediate market relevance.
- Prove Your Mettle: Compete in national and global hackathons with dedicated sponsorship for premier contests like ICPC, GSoc, and NASA Apps.

03 WorkX360

Get paid while you learn. We bridge the gap between classroom theory and industry practice from an early stage.

- Paid Rotational Internships from Year 2
- Exposure across Startups, Corporates, and NGOs
- Corporate Mentorship & Live Projects embedded into the curriculum
- High Conversion to Pre-Placement Offers (PPOs) and research fellowships

04 Founders' Forge: Your Startup Launchpad

For those who dream of building the next big thing, we provide the runway. Founders' Forge is your on-campus incubator.

- Unlimited Seed Fund for promising student ventures
- Advanced Tech Prototyping Labs
- Dedicated Co-working Spaces & Maker Labs
- Startup Bootcamps & Business/Pitch Training
- Tech VC Day: Pitch your groundbreaking innovations to real investors

This is more than a degree. It's your four-year launchpad to a top tech career.

The additions are now integrated under the CodeMiles pillar, where they logically fit and significantly strengthen the "real-world" credibility of the hands-on learning experience.

Why This Approach **Works:**

Future-Proof Curriculum

Updated every 6 months with inputs from Google, Microsoft, and top startups.

A College Without Borders

Access to a national network of faculty, industry experts, and peers.

Outcome Tracking

Real-time dashboards help you and your mentors track progress on skills, projects, and career readiness.

Earn While You Learn

Your learning is backed by prospects to earn through internships and projects.

Why **Trust Us?**

Academic **Excellence**

Learn from directors of premier institutions and professors who have:

75+
Patents between them

400+
Research Papers published

250+
Experts shaping our curriculum

Industry **Mentorship**

Get mentored by leaders who built and scaled tech at:

Former Chairman

Former CIO

CXO Masterclasses

CTOs & VPs

The **uGSOT** Unifying Advantage:

Your choice of campus defines your environment, not your opportunities. As a uGSOT student at either institution, you join a single, powerful national consortium that gives you:

- A unified, industry-sparked curriculum, updated every 6 months
- Access to our combined network of 3,000+ hiring partners
- Unlimited Seed Fund potential for exceptional student ventures
- Cross-campus hackathons, guest lectures, and a connected alumni super-network

This is the **Ultimate Fusion:**

The depth and credibility of NAAC 'A' Grade universities with the breadth and agility of a national tech movement.

The **upGrad** Legacy

800
Corporate clients trained annually

30K
Placement annually

upGrad's International **Partners**

Our Alumni **work at**

Meet **Our Faculty**

Meet our industry experts and innovators who turn real-world experience into transformative learning.

ABHISHEK VIJAYVARGIA

Principal ML Engineer

Admission **Process**

A simple, transparent journey from application to admission.

01

Apply for the uGSOT Exam

Submit your application to secure a chance to appear for the entrance assessment.

02

Appear for the Exam

Take the uGSOT exam to demonstrate your aptitude and readiness for the program.

03

Personal Interview

Showcase your skills, passion, and potential in a one-on-one discussion with our admission panel.

04

Counselling Session

Receive guidance on program selection, career pathways, and tailored learning opportunities.

05

Block Your Seat

Confirm your admission and reserve your spot in the program to kickstart your tech journey.
